VOL. 14

TORONTO, MARCH 1, 1963

No. 2

ONTARIO RESEARCH COMMUNITY—

Artist's impression (left) of a possible lay-out for the Ontario Research Foundations various buildings on the new site. O.R.F. will be the nucleus of the Research Community. Model of Professional Tower (right) is to be located in the Ontario Research Community. This building will house the computer and data-processing services for the scientific community, and will provide space for consulting engineers and other processing services for the scientific community.

Temporary Drivers' Permits Are Now Valid For 90 Days

Temporary instruction permits for persons learning to drive motor vehicles are valid for 90 days. Transport Minister James Auld announced the extension period from 60 to 90 days in the Legislature. He said experience had shown that 60 days was not sufficient time for an average learner driver to become proficient in handling his vehicle. He also stated he had received many requests from commercial driving instructors to extend the valid period of these permits.

Mr. Auld said that the Department of Transport would extend office hours of Driver Examination Centres, on a trial basis, as an added service to the public. Effective March 1st all centres will remain open on Thursday evenings, to conduct tests for Temporary Instruction Permits for drivers' licences. No road tests will be conducted during the evening hours.

March 13 Deadline 1963 Car Licences

Ontario's 1963 car licence plates, vehicle permits and drivers' licences are now on sale. The 1963 plates—white markers on a black background—are available from 20 locations in Metropolitan Toronto and 270 in other parts of the Province. The deadline for obtaining the 1963 licences is March 13, and Department of Transport officials have announced that no extensions will be made.

Research Community Officially Opened Site To Occupy 300-Acres Near Clarkson

THE RESEARCH COMMUNITY at Sheridan Park is a planned cooperative development of industries' research laboratories in an area specifically reserved for this purpose, with the Ontario Research Foundation as its nucleus. A site occupying roughly 300 acres in Park Royal, near Clarkson, Ontario, has been selected for this development. The Ontario Research Foundation has agreed to purchase about 100 acres of this property, around which will be located the research laboratories of those Companies which elect to participate in the Community. Already, three Companies have announced their intention of locating their research facilities in the Community, and several other Companies are presently looking into the possibility. The three Companies are: The Consolidated Mining and Smelting Company of Canada Limited, Dunlop Canada Limited, and the International Nickel Company of Canada Limited.

A system of "ground rules" has been established to ensure that the overall development of the Community is maintained within reasonable limits. For example, no manufacturing facilities will be permitted on the site, and also, to preserve a park-like setting, buildings must occupy no more than 25 per cent of the land.

To administer the sale of land and these "ground rules", a non-profit corporation has been established which will be directed by representatives of the various Companies participating in the Community. This non-profit corporation is called The Ontario Research Community Incorporated.

The Ontario Research Community was officially opened recently. The ceremonial sod-turning was effected by Education Minister W. G. Davis. The ceremony included the planting of a tree by Dr. A. D. Misener, Director of the Ontario Research Foundation, assisted by senior officials of the Companies participating in the Research Community. Following a brief message of congratulations by Economics and Development Minister R. W. Macaulay, Dr. Misener addressed the 200 guests comprising Canada's top industrialists, research leaders and educators.

Present plans for the Research Community include the most up-to-date servicing systems, communications systems, power, water and gas systems. Bell Telephone plans to install the most advanced facilities on the continent. Already being designed is a modern high-rise building to house a computer and data processing centre, and to provide accommodation for consulting engineers, and other professional services. Plans also include the building of a Conference Centre, Lecture Theatre, and other special features.

IN BRIEF

A caribou survey is being carried out by the Department of Lands and Forests west and south of Red Lake. Moose plots also will be checked as a preliminary to more intensive work. A wolf survey also is being conducted in conjunction with the Port Arthur staff as to populations.

Properties Purchased For Provincial Parks

Lands and Forests Minister A. Kelso Roberts recently announced the purchase of two properties for provincial park use. The one property of approximately 1,000 acres on the north end of Balsam Lake will provide for boat anchorage and camping on the Trent Waterway and Highway No. 46 about two hours' drive from Toronto. The second consisting of about 90 acres on the east side of Lake Simcoe nearly a mile and one half south of Atherley and Highway No. 12, will provide largely for day use and will help to relieve the great pressures on Bass Lake Provincial Park where nearly 166,200 people enjoyed their summer spare time and Sibbald Point Provincial Park visited by over 342,000 people.

These two additional properties will help to fill the gap in the provincial park system in this area and will provide recreation facilities within two hours' drive of a major population complex.

PROVINCE'S 1963-64 BUDGET HITS A

BUDGET FORECAST OF ORDINARY REVENUE
FISCAL YEAR APRIL 1, 1963 TO MARCH 31, 1964

Department	Gross Ordinary Revenue	Application of Revenue to Expenditure	Net Ordinary Revenue
Agriculture	\$ 2,317,000	\$ —	\$ 2,317,000
Attorney-General	10,753,000	1,021,000	9,732,000

	\$ 1,075,093,000	\$ 45,612,000	\$ 1,029,481,000

Many Major Highway Construction Projects Completed During 1962

In 1962 there was an increase in the number of contracts awarded for new construction and for maintenance of the highway network over a comparable period in 1961.

Highways Minister Charles S. MacNaughton's year-end report showed between January 1st and December 5th 522 contracts were awarded as compared with 429 during the same period in 1961. The total tender value of contracts also showed an increase of more than \$10,000,000 over the 1961 figure of \$6,180,000.

Among the major projects highlighting the 1962 program were: the \$20,000,000 Homer Skyway; the Ottawa Queensway; the Rainy Lake Causeway and extensions to Highway 401. Good progress was made on two new freeways, 403 and 405, and a large volume of work was carried out on the Trans-Canada Highway.

In September a 13-mile section of Highway 401 from Lancaster to Cornwall was opened to traffic; and in November another 14 miles was opened between Odessa and Napanee. The addition of these 27 miles brought the total mileage of Trans-Provincial Highway 401 in use by the end of the year to 404 miles. Construction of the remaining 106 miles is well advanced and 1963 will see the entire 510 miles of freeway, stretching from border to border, opened for traffic.

In the spring, the Highways Department awarded contracts for the building of service centres at strategic points along Highway 401 between Belleville and London. A total of eight contracts was awarded and by mid-July temporary service facilities were in operation. Permanent service centres are now being constructed at all eight locations and will be completed and in use early in 1963.

Early in November construction got under way on the widening of the Toronto By-pass section of Highway 401. The first stage is from Avenue

No Tax Increase—Appropriation

Features And Highlights Of The Budget Statement
James N. Allan On Thursday

Summary Of Financial Operations In 1962-63

THE FOLLOWING is a summary—based on nine months' actual and three months' forecast—of the financial operations of the Province in the current fiscal year.

Net ordinary expenditure, including \$35.8 million in supplementary estimates and \$39.0 million for sinking fund but excluding \$70.0 million for capital payments financed out of current revenue, is estimated at \$915.3 million. Net capital expenditure on physical assets is \$214.8 million, consisting of \$176.6 million for Provincial highways and municipal roads, \$31.9 million for public works, \$4.5 million for conservation projects, \$1.1 million for mining and logging roads and \$0.7 million for rural power lines. Combined net ordinary and capital expenditures in 1962-1963 are estimated at \$1,130.1 million, an increase of \$152.6 million over the corresponding expenditures of \$977.5 million in 1961-62.

Of the \$152.6 million increase in net ordinary and capital expenditures in 1962-63, education accounts for \$92.1 million or over 60 per cent of the growth in expenditure. Other increases in expenditures include \$15.4 million for health, \$12.2 million for highways and roads, \$3.5 million for lands and forests and \$3.6 million for public welfare.

Net ordinary revenue and net capital receipts for 1962-63 are estimated at \$987.7 million, of which \$2.4 million represents net capital receipts. This is an increase of \$160.3 million over the 1961-62 combined net ordinary revenue and net capital receipts. The major proportion of the increase in revenue results from the first full year of operation of the retail sales tax and the improvement in the Province's share of the individual income tax field from approximately 14 per cent to 16 per cent of the Federal Government's gross rates of tax. Economic growth also made an important contribution to the marked improvement in revenues. Principal sources of revenue are: Corporations Tax, \$182.0 million; Personal Income Tax, \$151.8 million; Retail Sales Tax, \$174.0 million; Gasoline Tax, \$170.0 million; Liquor Control Board, \$90.0 million; Motor Vehicle Licences, \$70.9 million and Succession Duty, \$44.0 million.

Interim surplus on ordinary account is estimated at \$30,000 after providing \$70.0 million for capital payments financed out of ordinary revenue and \$39.0 million for sinking fund. After taking into account net capital expenditure of \$214.8 million and net capital receipts of \$2.4 million, shortfall of revenue is therefore \$103.4 million.

Forecast Of Expenditures And Revenues For 1963-64

NET ORDINARY EXPENDITURE for 1963-64, including \$41.5 million for sinking fund but excluding \$62.0 million for capital payments to be financed out of ordinary revenue, is forecast at \$967.1 million.

After allowing for the \$2.5 million increment in the provision for sinking fund, the increase this year in departmental expenditures amounts to \$49.3 million. Because this is a dynamic year in the development of education, the great proportion of the total increase in net ordinary expenditure has been allotted to our schools and universities.

Next year the net capital expenditure on physical assets will total \$238.8 million, an increase of \$24.0 million over the present fiscal year. Of this

Road to Hogg's Hollow, a distance of just over one mile. The over-all plan calls for widening of other sections, by stages, between Islington Avenue, on the west, and Woodbine Avenue, on the east. The construction schedule has been left flexible so that priority can be given to those sections where traffic conditions warrant an expansion of the existing facilities.

On the main route of the Trans-Canada Highway through Ontario there were 132 miles of highway being constructed to meet, or better, the high standard required for all Trans-Canada Highway mileage. By the end of the year 84 miles had been paved and completed. Reconstruction of the remaining 48 miles was well advanced and paving of these sections will get underway in 1963. Included among the sections completed in 1962 was the Parry Sound By-pass and related work on Highway 69 which involved the reconstruction of 10 miles of this important artery between Northern and Southern Ontario. On Trans-Canada Highway 17, between Fort William and Kenora, a total of 67 miles of existing highway was being reconstructed to a higher standard.

Construction has progressed favourably on the Ottawa Queensway and the section, known as "Stage 3", from Carling Avenue to Bronson Avenue—a distance of 2.5 miles—is scheduled for opening in 1963. When completed, this new section of the Queensway will provide a six-lane, controlled-access route between the two points. The Ottawa Queensway forms part of the main Trans-Canada Highway through the Province.

In November the last girder, marking the completion of steelwork, was put into place on the \$20,000,000 Homer Skyway. By the end of the year all contracts had been awarded for the construction of this mammoth structure. This project will be completed and opened for traffic before the end of 1963, thereby relieving the last major traffic bottleneck on the Queen Elizabeth Way.

Construction is also well advanced on Highway 405, a four-lane controlled-access route being constructed to connect directly the Queen Elizabeth Way with the recently opened Queenston-Lewiston International Bridge. This important five miles of expressway is scheduled for completion in 1963.

Another controlled-access highway now under construction is No. 403 which will provide a high speed route from the Queen Elizabeth Way, near

ALL-TIME HIGH OF \$1,205.9 MILLION

For Education Totals \$387,500,000

To The Ontario Legislature By Provincial Treasurer
February 7, Are As Follows:

amount, \$192.5 million or over 80 per cent will be spent on Provincial highways and municipal roads. Public buildings, mainly hospitals and schools, will require \$33.0 million. Another highlight of the capital program is the provision of \$5 million for resource development.

The aggregate of net ordinary expenditure and net capital disbursements is forecast at \$1,205.9 million, an increase of \$75.8 million over the present fiscal year.

In 1963-64, major departmental programs (net ordinary and capital expenditures on physical assets combined), with this year's expenditures appended in brackets, will be as follows: Education, \$387.5 million (\$353.8 million); Highways, \$275.0 million (\$255.5 million); Health, \$132.6 million (\$145.7 million); Public Welfare, \$61.8 million (\$58.0 million); Public Works, \$46.6 million (\$43.9 million); Municipal Affairs, \$44.7 million (\$42.2 million) and Lands and Forests, \$38.4 million (\$31.5 million).

For 1963-64, the aggregate of net ordinary revenue and net capital receipts is forecast at \$1,031.1 million, including \$1.6 million in net capital receipts. This represents an increase over the current fiscal year of \$43.3 million.

Major sources of revenue for 1963-64 are forecast as follows: Corporations Tax, \$190.0 million; Retail Sales Tax, \$180.0 million; Gasoline Tax, \$176.0 million; Income Tax Collection Agreement, \$171.4 million; Liquor Control Board, \$94.0 million; Motor Vehicle Licences, etc., \$75.9 million and Succession Duty, \$42.0 million.

TAXATION

There will be no new taxes this year. Legislation will be introduced to provide tax incentive under the Corporations Tax Act. There will be minor adjustments to the Retail Sales Tax Act, mainly of an administrative nature. Amendments will be submitted to the Succession Duty Act to provide a clear exemption of \$60,000 in the case of widows and of \$10,000 for each dependent child.

EDUCATION

Grants to elementary and secondary school boards in the coming fiscal year will total \$233.3 million. In the current fiscal year maintenance, capital and special purpose grants to universities amount to \$45.6 million. In 1963-64 this total will be increased by more than 50 per cent, to approximately \$70 million. In the current fiscal year some \$1.7 million will be awarded in scholarships and bursaries and \$2.4 million will be lent to deserving students. These programs will be expanded in 1963-64. A new program of post-graduate scholarships designed to increase the supply of potential staff members for the universities will be instituted.

HEALTH

In the coming year, the Province's estimated expenditure for mental health purposes will total \$58.9 million, an increase of \$4.9 million over that in the current fiscal year. Work will begin this year on the new Psychiatric Institute in Toronto. Large renovation programs are being planned for the Ontario Hospitals at 999 Queen Street West, Toronto, and at London. Three hospitals for the mentally ill are planned for Northern Ontario so that the present hospital at North Bay may be used for children. These hospitals will be at Timmins, Sault Ste. Marie and Sudbury.

Burlington, through the northern part of Hamilton to Highway 401, near Woodstock. During the year construction was in progress over seven-and-a-half miles of this new highway from the Queen Elizabeth Way to the King and Main Streets interchange in Hamilton. The construction of the seven-and-a-half miles of new highway in the vicinity of Hamilton will require 20 structures, including those in the Main and King Streets interchange.

The most spectacular project to be opened in 1962 was in Northern Ontario—the \$20 million Sault Ste. Marie International Bridge, officially opened October 31. In this undertaking the Province of Ontario has a \$7,850,000 stake through the outright purchase of a bond issue.

The \$6,000,000 Rainy Lake Causeway, located east of Fort Frances on King's Highway 11, showed marked progress during 1962. Before the end of October, traffic was using the new causeway. Closely related to this project is the extension of Highway 11 from Fort Frances to Atikokan. By the end of 1962 construction was completed, or in progress, on 46 miles of this route and construction of the remaining 36 miles is expected to be under way by the end of 1963.

Last July a new 44-mile Secondary Highway, No. 637, from Trans-Canada Highway 69 to Killarney, on Georgian Bay, was officially opened, thereby ending the virtual isolation of this picturesque fishing hamlet and popular touring resort.

Built under the Roads-to-Resources program, the 61 miles of new highway from Foleyet to Chapleau was opened to traffic last June. The extension of King's Highway 101 makes possible a more direct connection between the Timmins and Sault Ste. Marie areas. Construction continued on the extension of Highway 101 from Chapleau to connect with Trans-Canada Highway 17, at Wawa—close to Lake Superior—a distance of 80 miles. In 1962 grading of the first 22 miles west from Chapleau was completed and, at the Wawa end, grading of eight miles easterly was begun.

This year a new type of road, known as an "Industrial Road" was added to Ontario's northern highway network. In October the first road to be so designated, from Manitouwadge to Caramat—a distance of 55 miles—was opened for public travel. Built by a paper company, the new road was

BUDGET FORECAST OF ORDINARY EXPENDITURE FISCAL YEAR APRIL 1, 1963 TO MARCH 31, 1964

Department	Gross Ordinary Expenditure	Application of Revenue to Expenditure	Net Ordinary Expenditure
Agriculture	\$ 18,863,000	\$ —	\$ 18,863,000

SUMMARY

ORDINARY REVENUE AND ORDINARY EXPENDITURE FISCAL YEAR APRIL 1, 1963 TO MARCH 31, 1964

Net Ordinary Revenue		\$1,029,481,000
Less: Net Ordinary Expenditure	\$925,603,000	
Provision for Sinking Fund	41,500,000	
Capital Disbursements to be financed out of Ordinary Revenue	62,000,000	1,029,103,000
Forecast Surplus		\$ 378,000

opened to the public in return for partial provincial subsidy towards its maintenance.

Considerable work was carried out on Resources Roads and Forestry Roads in northern Ontario. Construction of the road south from Savant Lake was far enough progressed by October to connect with private roads in the area, thereby providing a link between the rich mining areas around Pickle Crow and Trans-Canada Highway 27, near Ignace. On the Spruce River Road, running north from Port Arthur to Cheeseman Lake, a 54-mile section was opened to traffic in July and construction was under way on an additional 20 miles before the end of the year.

Under the "Roads to Resources" program established in 1958, more than ten million dollars has been expended to date and 207 miles of new roads have been built, opening large areas of northern Ontario for development and for recreation.

During the past year the Department of Highways experimented with new engineering techniques and materials which are expected to lead to better and improved methods of highway construction in the future.

In July a new synthetic bituminous paving material was applied to a test section of Highway 401. This new type surface is expected to prove an important advancement in the field of flexible pavement. It is also reported to have superior skid-resistant qualities over the conventional types of bituminous pavement surfaces now in use. If favourable results are obtained additional applications will be carried out.

Another major development is in concrete bridge deck finishing, using a machine similar to that which has been so successful in concrete paving construction. The special feature of this equipment is that it is carried on pre-set rails which control the surface contour. The final surfacing is concrete, eliminating the necessity for an asphalt overlay which had been required previously to obtain a smooth riding surface. The new technique is being used in Canada for the first time on the Homer Skyway now under construction on the Queen Elizabeth Way at St. Catharines.

COMING EVENTS

The Department of Travel and Publicity announces coming events in Ontario for the month of March as follows:

DATE	PLACE	EVENT
1- 2	Owen Sound	Red Cross Month
1- 2	Sarnia	Invitation Ski Jump Meet
1- 2	Toronto	International Mixed Curling Bonspiel
1- 3	Atikokan	Mississauga Mixed Curling Bonspiel
1- 3	Deep River	Bonspiel
2- 3	Oxtongue Lake	Mixed Bonspiel
3	Oshawa	Winter Capers '63 Carnival
3	Windsor	Invitation Ski Jumping Meet
3		Worldorama AKO Travologue Series: "An Arctic Summer"—Arthur Twomey—Cleary Auditorium
3	Windsor	Christian Culture Series: Detroit Symphony Orchestra—Cleary Auditorium
3- 6	Toronto	Association of Municipal Electrical Utilities of Ontario—Royal York
3- 6	Toronto	Ontario Municipal Electric Association—Royal York
4- 5	London	Firestone Tire District Sales Conference—Carousel Motel
4- 9	Hamilton	Victoria Mixed Bonspiel
4- 9	Toronto	Toronto International Bonspiel
6- 8	London	Westinghouse Sales Meeting—Carousel Motel
6- 8	Toronto	Canadian Automotive Service Show—Automotive Building
6- 9	Trenton	Bay of Quinte Mixed Bonspiel
7	Oakville	O.C.A. Colts Final (Bonspiel)
7- 9	Kenora	Winter Carnival
7- 9	Toronto	Canadian Diamond Drilling Association—Royal York
7- 9	Toronto	Ontario Credit Union League Limited—Royal York
7-April 7	Ottawa	Canadian Group of Painters—National Gallery
8- 9	Chatham	Chatham Pony Bonspiel
8-10	Toronto	Lambton G&C.C. Mixed Bonspiel
8-10	Elliot Lake	Women's Open Bonspiel
9	Collingwood	Collingwood Invitation Giant Slalom (Ski)—Georgian Peaks
9	London	Forest City Toastmasters Club—Holiday Inn
9	Ottawa	O'Keefe Ski Jumping Tournament
9	Toronto	American Society for Quality Control—Regional—King Edward Sheraton
9-10	Beardmore	Winter Carnival
10	Orangeville	Invitation Downhill Slalom—Cedar Springs
10	Windsor	Worldorama AKO Travologue Series: "Hawaii"—Dr. Charles Forbes Taylor—Cleary Auditorium
10-12	Toronto	Home Manufacturers Association—Royal York
10-13	Toronto	Prospectors and Developers Association—Royal York
10	Windsor	Christian Culture Series: "Proving the Existence of God"—Mortimer J. Adler—Assumption University of Windsor
11	Ottawa	Broadway Production: "Mary, Mary"
11-12	Toronto	Men's Clothing Manufacturers Association of Ontario, Sales Seminar—King Edward Sheraton
11-14	Toronto	Canadian Tire Corporation Associates—Royal York
12-14	Toronto	Mutual Fire Underwriters Association of Ontario—King Edward Sheraton
12-16	London	Western Ontario Drama Festival—Grand Theatre
12-16	Richmond Hill	Shillelagh Mixed Bonspiel
13	Cornwall	Manufacturing Opportunities and Industrial Trade Show
13	Windsor	Christian Culture Series: Toronto Symphony Orchestra, featuring Mr. Paul Doyon, Montreal—Cleary Auditorium

Premier Robarts To Open Sportsmen's Show, Toronto

Premier John Robarts will officially open the 1963 Canadian National Sportsmen's Show, to be held in the Coliseum, Toronto, from March 15 to 23. A colourful opening ceremony has been planned to launch this year's big outdoors extravaganza, which is described as "North America's finest springtime exhibition". Profits from the show will again be used to carry on a varied program to conserve Canada's natural resources of forest, field and stream.

Ontario Hosts First Conference Of Women

Approximately 300 women, representing the professions and specialized fields of interest at the consumer level, recently attended the first Conference of Women of Ontario.

During the meeting, the women established a constitution committee and ten other committees to research and submit recommendations in the consumer field to the provincial government.

The conference was called by Economics and Development Minister Robert Macaulay, as a result of the increasing interest the women of Ontario have shown toward contributing directly to all phases of the Ontario Trade Crusade Program.

Mr. Macaulay also addressed a "Consumer Trade Crusade" dinner, attended by some 2,000 women from all parts of the province. They represented a wide cross-section of women's organizations of Ontario, and also individual women who are recognized for their contributions to their communities. Mr. Macaulay solicited for Ontario's Trade Crusade Program from women all over Ontario, and outlined the role women can play in the economic development of the province.

Land Acquired For Conservation Acres

Lands and Forests Minister A. Kelso Roberts has announced the approval of a Provincial grant of \$153,025 to the Grand Valley Conservation Authority to carry out a scheme to acquire Kitchener-Waterloo Conservation Areas.

The Authority wishes to initiate a scheme whereby 1082 acres of conservation land, comprising a total of 44 parcels of land in three blocks, may be obtained. The three areas are in parts of the Kitchener, Waterloo, Bridgeport conurbation. They are mainly flood plains required for water control schemes but all have at least some incidental recreational value.

The purpose of this publication is to advise the people of Ontario of the services which their Government renders. Such services are effective in the degree to which they are known and used. The contents are for immediate republication. When change of address is requested, the address as printed on a copy of the publication should be enclosed. Communications with regard to the publication should be addressed to The Director, Division of Publicity, Issued by the Division of Publicity, Dept. of Travel and Publicity, Parliament Buildings, Toronto.

Second Stage Construction Ont. Hospital, Palmerston

Tenders for the second stage of construction of the new mental hospital at Palmerston, estimated at \$3,500,000, were called recently by Public Works Minister Ray Connell.

He said this second stage will consist of six pavilions, a laundry, service wing, administration section and infirmary building with connecting tunnels and corridors. The first stage consisting of the power, trades and garage buildings was started in May 1962 and is in a well advanced stage, he said.

"The new Ontario Hospital at Palmerston is being established to provide care for those mentally retarded, resident in Western Ontario," J. Fred Edwards, M.P.P. for Perth, said. "It is to be equipped to provide care, training and rehabilitation for those who require admission to such an institution."

The Works Minister said the initial bed capacity will be 340 but that provision has been made in the plans for ready future expansion. All of the buildings, with the exception of the infirmary building, which rises two storeys, will be of one storey.

Annual Industrial Waste Meeting Set For June 23-26

The 10th Industrial Waste Conference, sponsored by the Water and Pollution Advisory Committee to the Ontario Water Resources Commission, will be held at Honey Harbour, Ontario, June 23rd, 24th, 25th and 26th, it has been announced. Complete program details are not yet available.

OWRC Contract Awards Worth \$3.1 Millions

Chairman A. M. Snider of the Ontario Water Resources Commission has confirmed awards of \$3,118,139-40 in contracts for five sewage works and one water works in six municipalities, stretching from Fort William in the northwest to Gananoque in the southeast.

Two of the contracts were for sewage works in Fort William, one for \$2,151,817, for a sewage treatment plant, and the other for \$197,832.75 for construction of influent and outfall sewers. A sewer by-pass will be installed for the adjoining municipalities of Newmarket and the Township of East Gwillimbury for \$7,530. A contract for \$236,817.90 has been awarded for installation of trunk sanitary sewers in the Township of Saltfleet. One has also been awarded for construction of a sewage pumping station, sanitary sewers and a foremain for Gananoque for \$352-237.55.

NEW TRADE SCHOOLS—

Public Works Minister Ray Connell has called tenders for the new Provincial Institute of Trades at Ottawa (upper left) which will cost more than \$4,000,000. It will be built on a 12-acre site facing on Woodroffe Ave., in Nepean Township. The school will be partly two storey and partly single storey. Trades to be taught include retailing, barbershop, hairdressing, business machine repairs, fine instrument repairs, commercial art, draughting, machine shop work, electrical construction, electronics, dental technology, general science, paper technology, welding, building trades, automotive and light diesel trades, body and fender work and horticulture. The day school capacity is about 600 students. Mr. Connell has also called tenders for a Provincial Institute of Trades building at London (upper right), estimated to cost approximately \$3,500,000. The school will be built on a 1000 by 657-foot tract of land on existing Ontario Hospital farm property located north of Oxford St., east of Highbury Avenue. The project will consist of two separate buildings of steel frame and masonry construction. A tunnel below the surface will link the Main Building with the secondary building to the north and rear. The Main Building, 400 feet by 300 feet, will comprise a single-storey administration, gymnasium and general workshops section and a two-storey classroom wing. The two-storey classroom wing contains seven large classrooms, a hairdressing salon, library, workroom and printing section.

New School Grants System Will Entail Many Changes

Premier John P. Robarts has made a statement in the Legislature, in which he announced there would be changes in the Government's system of school grants, commencing in 1964. The changes, he said, are designed to promote a fuller equalization of educational opportunities in the province.

Mr. Robarts promised a new allocation of corporate tax revenue, through a special grant which would give the separate schools more money, while not giving the public schools less. The new provisions, he emphasized, apply equally to public and separate, rural and urban schools. He stated there would be increased education grants, totalling \$32,000,000 this year, which would make provisions for a gradual transition to the new system. The new system will be known as the Ontario Foundation Tax Plan, 1964.

3-Year Drivers' Licences

Ontario's new system of three-year drivers' licences will begin operating at the end of this year, Transport Minister James Auld announced recently.

In presenting his department's annual estimates in the Legislature, Mr. Auld said licences under the new system will be timed to expire on the date of the drivers' birthdays.

The change-over, which will take three years to complete, will involve the use of automated systems, Mr. Auld said. He assured the members this would cause absolutely no reduction in staff as persons replaced by automation would be absorbed into other branches to handle the steadily increasing work loads.

Great River Road And Trans-Canada Highway Make Important Link Between Ten States And Ontario

COMPLETION of The Great River Road, a stretch of highway beginning at New Orleans and running north to Manitoba, Ontario, and linking with the Trans-Canada Highway, will help to increase to unprecedented numbers, tourists crossing the border from the United States into Ontario. This great highway will be a distinct advantage to the tourist industry in this province, particularly to the northwestern region.

The Mississippi River Parkway Commission is responsible for the planning of The Great River Road. The Commission is composed of representatives of the states touching on the Mississippi River, together with representatives from Manitoba and Ontario. The States involved are Arkansas, Illinois, Iowa, Kentucky, Louisiana, Minnesota, Mississippi, Missouri, Tennessee and Wisconsin. The objective of the Commission is to bring about the construction of highways on both sides of the Mississippi River, from the Gulf of Mexico to Lake Itasca in northwest Minnesota. From there, connecting links will go to Fort Frances and Rainy River in Ontario and through the northwest angle to Manitoba.

The immediate plan is to build a single route alternating on both sides of the River, which will be 2,250 miles in length and which, when completed, will constitute the longest parkway in the world. The concept of the completed road, in the long range program, is for a four-lane highway, bordering both banks of the Mississippi River, into Lake of the Woods area. It will bisect a continent from New Orleans to Kenora, passing through Fort Frances and the district of Rainy River. This super highway will be heavily accented with parks, park facilities and scenic attractions.

Ontario's first active participation in this great project took place in 1954. At that time a representative from Ontario was invited to attend meetings, in consultation with representatives from the United States, to consider the joining of the Great River Road and the Trans-Canada Highway. The suggestion to join the two great highway systems was adopted. In 1955 a ceremony took place, with the erection of a commemoration stone linking the two highways. Representatives from the Ontario and Manitoba Governments and the Lieutenant-Governor of Minnesota were present. The unveiling ceremony took place at Longbow Corners which is the junction of Highways 70 and 17, thirteen miles southwest of Kenora.

The great tourist potential for Ontario, and the excellent opportunities this great highway offers, can be appreciated in the fact that the population of the ten states and the two provinces involved in the Great River Road project is in excess of 50 million people. Even greater opportunities for travel into Ontario can be visualized with the completion of the highway between Fort Frances and Atikokan, facilitating a scenic tour along the Lake Superior section of the Trans Canada Highway. The \$6,000,000 Rainy Lake Causeway, located east of Fort Frances on Highway 11, showed much progress toward completion during 1962. Traffic was using the new causeway last October. Closely related to the Causeway is the extension from Fort Frances to Atikokan. By the end of 1962 construction was completed, or in progress, on 46 miles of this route. Construction of the remaining 36 miles is expected to be under way by the end of 1963.

Hydro—

25-Minute Film Depicts Nuclear-Electric Power

Canada's first nuclear - electric power development—NPD—has been colorfully described in a 25-minute film. It was sponsored by Ontario Hydro, Atomic Energy of Canada Limited and Canadian General Electric. These were the three agencies which co-operated in the pioneering nuclear project.

The NPD story, as shown in the film, is presented in a non-technical, interesting manner, and, as such, should have appeal to a wide audience. The film also deals with the advantages of the Canadian concept of nuclear power, which utilizes natural uranium as a fuel and heavy water as a coolant and moderator.

Three OWRC Contracts Valued At \$1,295,225

Three contracts with a total value of \$1,295,225.20 have been awarded for construction of sewage works in three municipalities, it has been announced by Chairman A. M. Snider of the Ontario Water Resources Commission.

These three OWRC projects are at Fort Frances, where a sewage treatment plant will be built at a cost of \$783,351.00; at Burlington, where an east end trunk sanitary sewer will be installed, at a cost of \$312,443.60; and at Tarentorus Township, of neighbouring Sault Ste. Marie, where trunk sanitary sewers, costing \$199,420.60, will be installed.

GAME FISH MANAGEMENT PROGRAM

Stocking lake with speckled trout.

Preparing river bed for egg planting.

Purpose Is To Maintain Good Fishing Despite Increasing Fishing Pressure

ALTHOUGH SOME PEOPLE IN ONTARIO don't realize it, one of the Province's most valuable natural resources is the abundance and the variety of fish in its countless lakes, rivers and streams. In addition to their considerable commercial value as food, many species are game fish which are popular with sports fishermen. Among these species are largemouth and smallmouth bass, yellow pickerel (walleye), speckled trout, rainbow trout, lake trout, maskinonge, northern pike, brown trout, Atlantic salmon (ouananiche) and aurora trout.

These, and other species of game fish are worth many millions of dollars annually to Ontario since each year they attract many hundreds of thousands of fishermen from outside the Province. Moreover, it is impossible to put a dollar value on the relaxed enjoyment, soaked-up sunshine and indefinable thrills that a million or more Ontario citizens derive from fishing.

One of the major functions of the Department of Lands and Forests is to maintain Ontario's valuable resource of game fish. Thirty years ago this didn't require much effort since there were plenty of game fish, and not many people were fishing for them. But in the years following several factors

indicated that each year an increasing number of people would be fishing in Ontario. Among these factors were, the exploding population in Ontario and the neighbouring U.S.A., the growth of summer cottages in Ontario's summer playgrounds, such as in the Muskoka, Kawartha Lakes, Haliburton Highlands and other districts, the multiplying numbers of fishermen with two and three weeks' vacation and the projected building of better highways which would enable vacationing fishermen from more distant points in the U.S.A. to reach Ontario.

All of these factors indicated that the fishing pressure on game fish in the more accessible waters of the Province was destined to increase greatly, and that it was important to place more and more emphasis on fish management with a view to a sustained yield, despite the increasing fishing pressure.

An important part of this programme is stocking waters with yearlings of catchable game fish of various sizes. Stocking performs three important functions: it re-populates waters in which the existing species of fish have been depleted or destroyed by such factors as over-fishing, pollution or winter kill; it puts fish into waters where the facilities for reproduction are inadequate, but where conditions for growth and survival of the fish are satisfactory; it provides legal-sized fish in heavily-fished waters where it is desirable to introduce more fish than the waters will produce under existing natural conditions; and it introduces fish into barren waters.

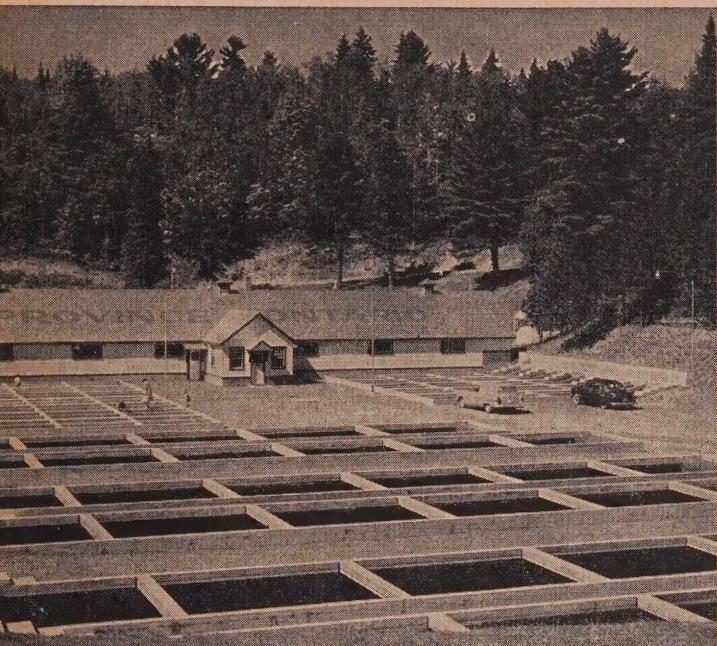

Stocking has been carried on in Ontario for the past fifty years. In the earlier periods the propagation of such commercial fish as whitefish, herring

COMING EVENTS

The Department of Travel and Publicity announces coming events in Ontario for the month of April as follows:

DATE	PLACE	EVENT	PLACE	EVENT
1	London	Electric League—Carousel Motel	Toronto	Canadian Importers and Traders Association Inc.—Royal York
1	Ottawa	Montreal Symphony Orchestra—Ronald Turini, pianist	Windsor	Tourist Hospitality Conference—Assumption University
1- 2	Owen Sound	Mardi Gras Festival	Toronto	Personnel Association of Toronto—Royal York
1- 4	Toronto	York Concert Society—Director Heinz Unger—Soloist, Paul Heimer—Eaton Auditorium	Brantford	"Flashing Blades" Ice Show—Arctic Arena
1- 5	Toronto	Canadian Association of Broadcasters—Royal York	London	Ontario Humane Societies—Holiday Inn
1- 5	London	Registered Nurses Association of Ontario—Hotel London	Terrace Bay	Annual NOCA Bonspiel
1- 6	Dixie	Apple Blossom Festival	Windsor	Association of International Border Agencies—Elmwood Hotel
1- 6	Kitchener	Waterloo County Sportsmen's Show	Toronto	World Adventure Tours "HAWAII"—Eaton Auditorium
1- 6	Ottawa	Central Canada Sports and Home Show	Toronto	Navy League of Canada—Ontario Division—Park Plaza
1- 7		National Health Week	Toronto	National Home Show—Coliseum
1-25	Toronto	Spring Harness Meet—Greenwood Track (Old Woodbine)	Toronto	Annual Thunder Bay District Seed Fair
1-27	London	Ontario Society of Artists—London Art Museum	Port William	Special Young People's Concert: Windsor Symphony Orchestra
1-July 31	Ottawa	Harness Racing—Rideau Carleton Raceway	Port Arthur	Conductor, Matti Holli—Cleary Auditorium at 10:30 a.m.
2	Emo	Annual District Seed Fair	Windsor	Ontario Jaycees
2	Ottawa	Broadway Production: "Carnival"	Sarnia	Spring Meet (22 days)—Fort Erie Jockey Club Track.
2- 3	Toronto	Grocery Products Manufacturers of Canada—Royal York	Fort Erie	N.B.: No racing first three Tuesdays
2- 4	Toronto	Ontario Road Builders Association—Royal York	Windsor	Christian Culture Series: A. G. M. Smith—"Function of the Poet in a Nuclear Age"—Assumption University
2- 4	Toronto	National Canadian Samples Show—Automotive Building, CNE	Toronto	Worldorama AKO Travologue Series—E. G. Brigham, Jr.—"Down Mexico Way"—Cleary Auditorium
2- 4 & 6	Trenton	Mixed Closing Bonspiel—(TCC)	London	Industrial Accident Prevention Association—Royal York
2- 5	Orillia	Kiwanis Music Festival	Ottawa	Artist in His Studio—London Art Museum
3	Ottawa	Tourist Hospitality Conference—Bruce Macdonald's Motor Motel	Toronto	Canadian Camera Fair
3	Toronto	World Adventure Tours "AUXTRIA"—Eaton Auditorium	Toronto	High Park Mixed Bonspiel
3- 5	Windsor	Building Officials Conference of Ontario—Prince Edward Hotel	Kitchener	Festival of Daffodils
4	Dryden	Annual District Seed Fair	Toronto	Shriners Variety Show—Kitchener Memorial Auditorium
			Toronto	American Contract Bridge League—Ontario Unit—Royal York
			Toronto	Good Friday
			Toronto	Good Friday opening exhibition: Stock Car Racing—CNE
			Toronto	Track: 2:30 p.m.
			Toronto	Canadian Secondary Materials Association—King Edward
			Dundas	Tam O'Shanter Bonspiel
				Dundas Motorcycle Trials, Steel City Riders

ME BEING CARRIED OUT IN ONTARIO

Tarentorius hatchery, Sault Ste. Marie District.

Removing fingerlings from pond for restocking.

and pickerel was emphasized, and stocking was principally in the Great Lakes. But during the past few years the emphasis has changed to stocking game fish, especially speckled trout, rainbow trout and lake trout in inland lakes and streams.

Stocking of game fish is often unsuccessful because species are planted in unsuitable waters. Species of fish differ from one another in environmental requirements such as water temperature, food and oxygen. So the success of hatchery plantings is largely dependent on the need and on the quality of the water in which the fish are planted.

Following are a few examples of the habitat requirements of certain species:

Lake trout inhabit deep cold lakes, where the stratum of water in which they live is well-oxygenated in summer. Speckled trout requires a considerably higher concentration of dissolved oxygen than does a northern pike. Pickerel and maskinonge inhabit shallow lakes and rivers with relatively warm water. Pickerel, however, do withdraw to greater depths as the temperature in the shallows exceeds their tolerance during the summer months.

Maskinonge require a larger number of fish daily, while a smallmouth bass needs a wider range of diet such as fish and crayfish.

The planting of hatchery-raised fish in suitable waters is an important concern of the District Biologists. It is necessary to conduct an intensive examination of all waters to determine the need and the suitability of the environment prior to the planting of hatchery fish.

Stocking is done on a periodic basis to sustain fish populations in more heavily-fished waters. For example, it has been done in several popular speckled trout lakes in the northern part of the Tweed district in southeastern Ontario and periodic stocking of maskinonge is carried out in the Kawartha Lakes, where the fishing pressure is high.

Another important function of stocking has been the introduction of some of the Province's more popular game fish into waters where they have not been found previously. This type of stocking requires previous research to determine if the environmental factors which the species being introduced requires are present. It is also necessary to determine whether the introduction of the species will upset the existing balance of nature in that particular body of water and cause more harm than good. Despite these difficulties

several species have been introduced into new waters in Ontario. Primarily these have been those that a large number of people like to fish for, such as trout, smallmouth bass and maskinonge.

Another type of stocking which is important in Ontario's game fish management programme is the introduction into suitable waters of non-native fish. One of the most successful introductions has been the rainbow trout. These fish usually spend their growing seasons in the Pacific ocean and then ascend coastal streams of North America to spawn. They have been widely distributed in Ontario in numerous lakes and streams throughout the Great Lakes' watershed. The rainbow are great fighters and display a salmon-like frenzy when hooked. Aurora trout, which is native to a few lakes in the Timagami Forest Reserve, and which is a close relative of the speckled trout, has been successfully introduced into a few Ontario waters.

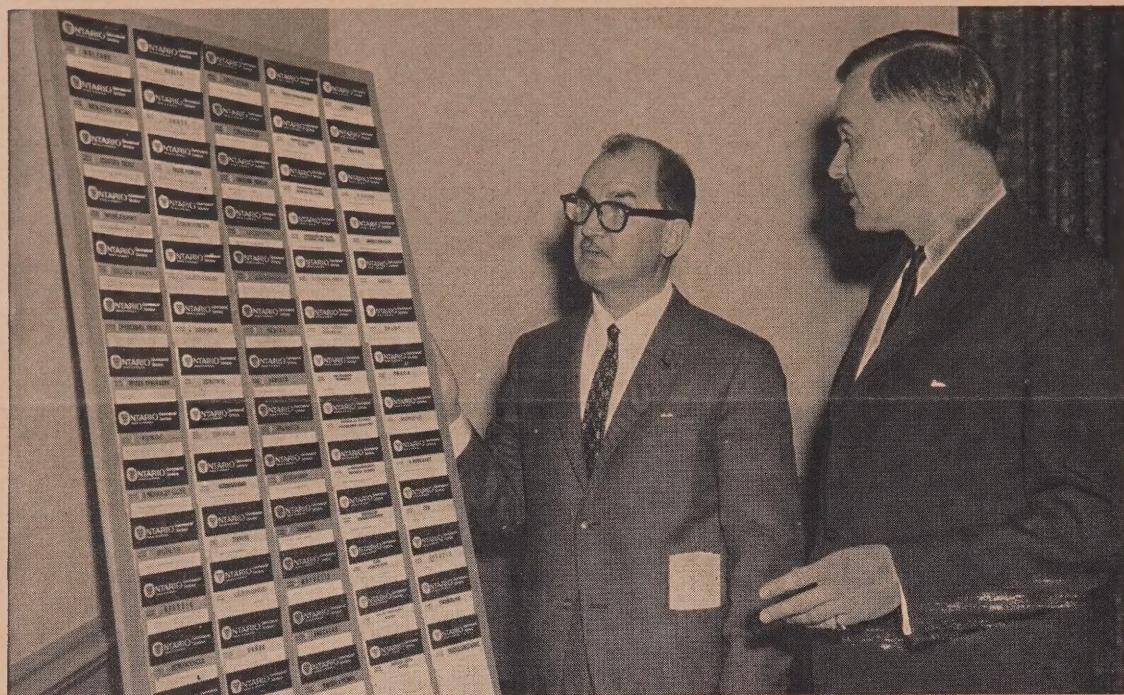

Many unsuccessful attempts have been made to re-establish the Atlantic salmon which, in pioneer days, existed in large numbers in Lake Ontario and were caught when they ascended tributary streams around Toronto to spawn. However, a land-locked form of the Atlantic salmon has been introduced successfully into Trout Lake in the Nipissing District. This is the ouananiche, which is native to Lake St. John in Quebec.

Various attempts have also been made to introduce Pacific salmon into Ontario. In 1955, following investigations of several rivers flowing into Hudson's Bay and James' Bay, the eggs of Pacific salmon were flown from the west coast to the Port Arthur hatchery. There they were hatched and reared to the fingerling stage or the eyed-egg stage and distributed to these rivers. There has been no evidence to indicate that any of these plantings were successful. However, in 1959 and 1961, a few Pacific salmon were caught in Lake Superior by anglers. These are believed to be the progeny of several hundred of the Pacific salmon fingerlings which the manager of the Port Arthur hatchery planted in the lake in 1955.

Another experiment which might provide large future dividends is the crossing of the speckled trout and the lake trout. The result is a hybrid game fish which has been named the "splake". By selective breeding various qualities of both the lake trout and the speckled trout can be developed in the hybrid stock. In this way hybrid trout may be produced which will live under specific environmental conditions not presently inhabited by either the lake trout or the speckled trout.

GOVERNMENT BOOKLETS IN 13 LANGUAGES—

Ontario's first government booklets to be published in 13 languages are examined by Prime Minister John P. Robarts (right) and Provincial Secretary and Minister of Citizenship John Yaremko. The booklets provide details of Ontario Government Services available to the public in the fields of Labour, Welfare, Education, Health and Workmen's Compensation. The booklets have been printed in English, French, Italian, German, Polish, Ukrainian, Hungarian, Dutch, Serbo-Croatian, Greek, Portuguese, Finnish and Slovak. The booklets are illustrated and are in a series of five. They are summaries of five seminars which were organized by the Citizenship Division of the Department of the Provincial Secretary and Citizenship, in co-operation with departments concerned. The seminars were attended by representatives of many individuals, voluntary groups and organizations interested in immigrant integration. A series of five booklets in any one of the 13 languages may be obtained free from the Citizenship Division, Room 167, Main Parliament Buildings, Toronto.

24-25	Algoma	District Feed Fair
24-26	Kitchener	Municipal Fire Prevention Officers
24-26	Port Arthur	Thunder Bay Municipal Association
24-26	Toronto	Canadian Life Insurance Medical Officers Association—Park Plaza
25	London	The Claims Supervisors Life Office Manager Association—Carousel
25	Toronto	Trust Companies Association of Canada-Ontario Section—Royal York
25	Toronto	Stop Over Point—Shell "4000", Trans Provincial Sports Car Rally
25	Toronto	Automotive Parts Manufacturers' Association (Canada) — Seaway Towers
25-27	Peterborough	Peterborough Sportsmen's Show
25-27	Timmins	Timmins-Porcupine Sportsmen's Show
25-27	Toronto	American College of Surgeons Sectional Meeting—Royal York
26	Grand Valley	Schneider's Male Chorus—Grand Valley High School
26	Ottawa	Cleveland Orchestra—Conductor, George Schell
26	Toronto	USAC Midget Races—Indianapolis Racing, Cars and Drivers: \$10,000 purse—CNE Track
26	Toronto	Canadian Arthritis and Rheumatism Society—Royal York
26-May 4	London	London Little Theatre—"Not and the Book"
26-May 25	Campbellville	Opening Meet (Standard Bred Horse Racing)—new Mohawk Raceway
27	Toronto	Ontario Hockey Association—Royal York
27-28	Cobourg	Y's Men's Clubs—Eastern Ontario
27-May 4	Ottawa	Ottawa Music Festival
28	Brantford	Brantford Symphony Orchestra: Conductor, Claude Keast; Guest soloist, Garnet Brooks—Capitol Theatre
28	Pickering	Brown's Motorcycle Trials (NORTOWN)
28	Norval	Guelph Area Group, Ontario Dairy Goat Society, 2 p.m. at home of Mr. and Mrs. Mac. Alexander, 10th Line, Esquing Twp., "Rosegate Farms", north of No. 5 Side Road—Lunch, 12 noon
28	Toronto	Ontario Watchmakers' Association—Westbury
28-29	Toronto	Ontario Tuberculosis Association—Royal York
28-30	Toronto	National Council of the Baking Industry of Canada—Royal York
29	London	Western Ontario Funeral Directors convention—Hotel London
29-May 1	Toronto	Association of Canadian Advertisers—Royal York
29-May 2	Toronto	Canadian Daily Newspaper Publishers Association—Royal York
29-May 2	Toronto	Canadian Press Association—Royal York
29-May 3	Toronto	Commercial Vehicle Driver-training course: Ontario Safety League, 208 King Street West
30-May 4	London	Canadian Autorama—Western Fair Grounds

April 1—March 31 Licence Year Commercial Vehicles And Trailers

Transport Minister James Auld has reminded all commercial motor vehicle and trailer owners that the 1963 annual commercial plates, for the new commercial licensing year, have been on sale for some considerable time.

Starting this year the licence year for all commercial motor vehicles and trailers has been changed to run from April 1 this year to March 31 next year.

This, Mr. Auld said, has been done to enable the introduction of quarterly licensing for commercial vehicles which would become effective on April 1 this year. He said this new quarterly arrangement would benefit those owners who did not need to use their vehicles for a full year. They could purchase plates for any one or more quarters to cover the period when the vehicles would be used. It was also possible now to reduce the registered gross weight of a vehicle, if necessary or desirable, for any quarter by licensing it quarterly, Mr. Auld said.

More Mental Health Clinics Planned Over 5-Year Period

Health Minister Dr. M. B. Dymond, in presenting the estimates of the Department of Health to the Legislature, said that an accelerated programme of community health clinics is planned for the next five years. He said that at present there are 24 clinics serving 43 centres under Department of Health auspices, and 13 clinics operating under local agencies. Plans call for the addition of 27 new clinic teams, five of which will be added this year, as the first phase of this programme.

Community psychiatric hospitals will be begun at Timmins and Sault Ste. Marie, Dr. Dymond stated. The Department of Health will co-operate with the Canadian Conference on Children in a research project, to extend over a period of four years, to determine the needs of, and identify the services required by children.

138-Page Publication Covers Province's Mining Operations

A complete summary of mining activities in the province and the operations of the Department of Mines in 1962 was presented to the Legislature recently by Mines Minister George C. Wardrobe.

The Review which is titled "Breaking New Ground in 1962" summarizes activities in each of Ontario's 80 producing mines and in the 32 others which were in various stages of development during the year. It also deals with metallurgical plants, of which there are 24 in the province, whose operating procedures are controlled by the Mining Act. Another section covers quarry and pit operations of which there are nearly 800 in Ontario.

Ontario Truckers To Register Rates With Transport Board

Transport Minister James Auld has announced that as of May 1st most Ontario truckers will be required to file with the Ontario Highway Transport Board their rates charged for hauling of goods.

Excluded from the rate-filing procedures will be operators of fleets of four vehicles or less, livestock and farm supply carriers and most dump trucks and construction vehicles.

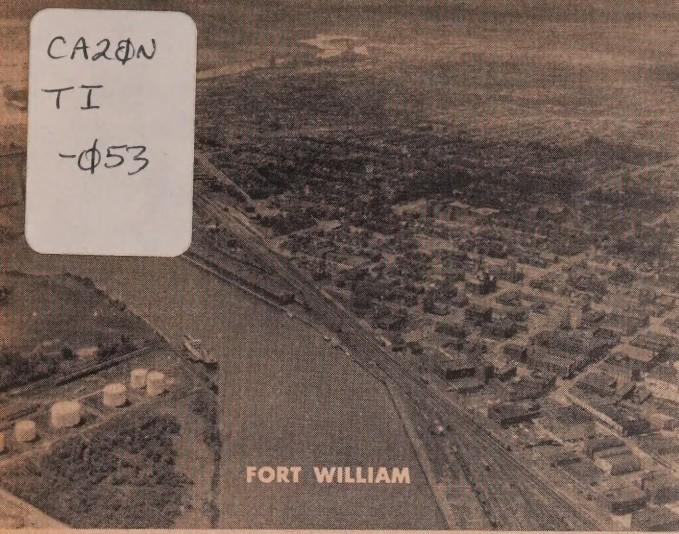

"The rate-filing measures," Mr. Auld said, "are designed to make available to shippers the rates being offered by all carriers. The regulations also will provide a reasonable measure of stability in the transportation industry."

The new measures prevent any licenced trucker from changing his rates for a period of 30 days after they are filed with the board. It also will be illegal to charge any rate other than that filed in the tariff of tolls.

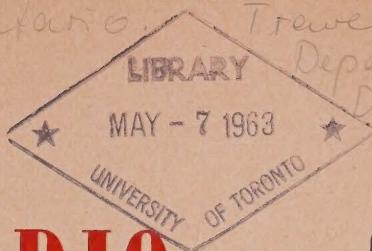

The purpose of this publication is to advise the people of Ontario of the services which their Government renders. Such services are effective in the degree to which they are known and used. The contents are for immediate republication. When change of address is requested, the address as printed on a copy of the publication should be enclosed. Communications with regard to the publication should be addressed to The Director, Division of Publicity, Issued by the Division of Publicity, Dept. of Travel and Publicity, Parliament Buildings, Toronto.

No. 4

BLOSSOM TIME IN ONTARIO—

BLOSSOM TIME ROUTE

Blossom Sunday is planned for May 19, depending on weather conditions. The Department of Travel and Publicity, recognizing the importance of Blossom Time in Ontario to the tourist industry, publicizes this annual event. On the Thursday prior to the event a zoned radio programme is carried on a number of radio stations in Southern Ontario. These one-minute spot announcements point up the blossom displays and other attractions in various points, chiefly within the Niagara Peninsula. The same announcement also points to blossom displays in other regions of the province including Georgian Bay, Bruce Peninsula and the southern region of Eastern Ontario.

For the Niagara Blossom Festival a permanent blossom-time scenic route has been established. Hundreds of permanent scenic route signs have been erected, starting at Stoney Creek and ending at Queenston. Illustrated maps showing the blossom route will be sent, on request, by writing to the Clerk-Treasurer's Office, County of Lincoln, County Building, St. Catharines. For visitors from the west, the itinerary starts at Stoney Creek traffic circle, proceeding up Highway 20 as far as Ridge Road. Proceeding eastward, the route continues to County Road No. 30, then east on Highway No. 8, north on the Vineland Townline, along the Queen Elizabeth Highway to Lincoln County Road No. 20. The route continues south again to Highway No. 8, eastward to County Road No. 18, north again to Lakeshore Road. Then proceed along Lakeshore Road to Niagara-on-the-Lake and the Niagara Parks Boulevard to Queenston and Niagara Falls.

The route provides an excellent view of the fruit-growing area of the Niagara Peninsula. It also provides an opportunity to see several historic sites including the Jordan Museum of the Twenty, the Welland Ship Canal, Fort George and Navy Hall in Niagara-on-the-Lake, and Brock's Monument in Queenston. The white blossoms to be seen are either plums, sweet cherries or pears, while the pink blossoms are those of the peach, and the whitish pink blossoms are those of the apple. The sketch (upper left) shows the Blossom Time Route which thousands of people will be travelling. The attractive young lady (right) is shown as she poses in a Niagara fruit-belt orchard.

Board Of Governors For The Ryerson Institute

The Ryerson Institute of Technology, which has been operated by the Department of Education for the past fifteen years, is to have a Board of Governors which will direct its control and operation.

Last September the enrolment at the Ryerson Institute of Technology was 2,700 day students and 4,200 in the evening school. The day enrolment could increase to between 6,000 and 7,000 students by 1967, Education Minister William G. Davis stated. He was speaking in conjunction with the introduction of the Bill to establish a Board of Governors for the Ryerson Polytechnical Institute. The Board is to include representatives of the Department of Education, the University of Toronto and the Association of Professional Engineers of the Province of Ontario, as well as the Principal of the Institute and nine other members, residents of the Province, who will be appointed by the Lieutenant-Governor in Council. Due to the wide variety of its courses, the Institute is to be renamed THE RYERSON POLYTECHNICAL INSTITUTE. Since 1948, Ryerson has shown the need for properly qualified and expertly trained engineering technologists and business personnel.

Portable Pensions Plan Introduced In Legislature Affects Employers With Fifteen Or More Employees

PREMIER JOHN ROBARTS has introduced into the Legislature the Government's portable pensions legislation, which is to be known as The Pension Benefits Act. The Bill reflects the result of three years study by the Ontario Committee on Portable Pensions which was set up in April, 1960. An earlier version of the Pension Benefits Act was introduced in 1962 for discussion purposes. A series of public hearings was held between sessions, at which time comments and criticisms from interested organizations and individuals were heard. The Committee and the Government have since revised the Bill to meet some of the earlier criticisms.

The effect of the Bill is to require all employers with 15 or more employees in Ontario to establish at least a minimum pension plan by January 1, 1965. Those employers already having pension plans, would be required to amend them, if necessary, in order to bring them up to at least the minimum standards. The minimum standards, the cost of which may be shared by employers and employees, require that each plan provide at least a minimum level of benefit which must be retained to provide a pension for the employee. Employees aged 30 or over, who work for at least 18 months and who change jobs, will not be permitted to withdraw their contributions to the minimum benefit in cash. The minimum pension benefits are based on contributions related to a maximum of \$4,800 of annual salary and are expressed in terms of the three most common types of pension plans. For the "unit benefit" type of plan the pension on retirement must be at least one-half of 1 per cent of salary multiplied by years of service. For "money purchase" plans the benefits are based on the accumulation of at least 1½ per cent of salary for employees age 30-44; 2 per cent for employees age 45-54 and 3 per cent for those aged 55 and over. The minimum may also be expressed in terms of "flat benefit" pension of \$2 for each year of service.

This minimum standard will provide benefits of about \$80 per month after 40 years of service and about \$70 per month after 35 years of service.

(Continued on Page 2)

Hydro—

\$28-Million Coal Contract

A \$28,000,000 contract for Nova Scotia coal let by the Ontario Hydro-Electric Power Commission will result in the construction of one or two new coal carriers and some 600 jobs at a Port Weller shipyard. The announcement was made recently by Energy Resources Minister Robert Macaulay, when he presented the Department's estimates in the Legislature. Mr. Macaulay said that Ontario Hydro had signed a contract with Dominion Steel and Coal Company for 2,850,000 tons of Cape Breton coal, which will be shipped to Ontario over a five-year period for thermal electric generation. The Hydro purchase represents an average of 14 per cent of Nova Scotia coal production each year for the next five years. Mr. Macaulay, in making the announcement, said that no greater example could be cited by Ontario of the province's Trade Crusade Programme to buy Canadian production when price and quality are comparable to imports. He said if the coal had been imported from United States it would have cost Ontario Hydro \$1,425,000 in import duties.

ONTARIO WATER RESOURCES COMMISSION

Officials attend meeting in OWRC laboratory building.

OWRC Laboratory—Highway 401 and Islington Ave., Toronto.

Extensive Programme Started In 1957 Has Achieved Significant Progress

SINCE 1957 THE ONTARIO WATER RESOURCES COMMISSION has made significant progress in protecting one of the Province's most valuable natural resources—the quality of the fresh water in those lakes, rivers and streams in the more populous parts of the Province. For in the decade and a half preceding 1957 many were either polluted or in danger of becoming polluted.

This adversely affected the quality of drinking water; increased the cost of purifying water in water treatment plants; made untreated water unsuitable for many industrial purposes; killed aquatic life, including fish and water-fowl; created offensive odors which ruined waterfront property values; and destroyed the beauty and the facilities of water for such healthy outdoor recreations as swimming, fishing and boating.

There were several reasons for this alarming state of affairs.

Most important, the period during and after World War II has seen a tremendous and continuing expansion of Ontario's population and industry. This meant that each year growing communities in Southern Ontario in particular have had to get rid of an increasing volume of domestic sewage and industrial wastes. However, few were equipped to meet this challenge because it came on the heels of the Great Depression when communities had no funds to build sewage works to meet even their present needs, much less those of any projected future.

Then after World War II the communities needed large sums of money for a whole host of urgently needed public works, such as schools, roads, hospitals, water-treatment plants and sewage pipe-lines. Moreover, the increasing costs of materials and labor and high interest rates made it necessary for communities to budget their annual appropriations to meet their most pressing needs. This meant that construction of new and improved sewage plants usually lagged behind the need. Since sewage works were unable to process the increasing volume of domestic sewage from their burgeoning populations, they had to dump more and more untreated, or partially-treated, sewage into the public waterways. When this was added to that from smaller communities which hadn't sewage works, it created sufficient volume to pollute even such fair-sized streams as the Grand and Thames which have a number of communities of various sizes strung out along their lengths.

This pollution was added to in most cases by industrial wastes. These were either dumped directly from factories into waterways with partial or no treatment, or sent through their community's sewer lines to a sewage plant, where they received treatment. But, regardless of whether or not the industrial wastes were dumped directly or treated, they usually con-

tained complex chemical compounds which could not be removed by the ordinary cleansing processes employed in sewage plants.

These compounds included phenols which combined with chlorine at water purification plants to form objectionable chloro-phenolic tastes in water; cyanides, toxic substances which can kill all aquatic life; and oils and greases, which are similarly fatal to fish and water-fowl and the clear beauty of water.

In 1955, in recognition of these problems, the Ontario Government set up a committee to investigate ways of eradicating pollution. This was followed in 1956 by the creation of the Ontario Water Resources Commission. At the 1957 session of the Legislature the scope of the Commission was broadened considerably, and it began functioning with two principal objectives: to ensure maintenance of public water supplies in a safe condition for domestic consumption and other uses; and to make it possible for municipalities to have modern sewage and water works by aiding them in their design, construction, financing and operation.

Insofar as eradicating pollution was concerned the Commission was given the responsibility to locate all sources of pollution—whether caused by municipalities, industries or individuals—in all lakes, rivers and streams in Ontario. It was then authorized to exert every effort to persuade the offender to remedy the condition that was causing the pollution. If this failed after a reasonable length of time had elapsed, the Commission was given the power to take the offender to court, where the offending municipality, industry or individual could be fined and ordered by the court to remedy the condition.

In addition, since many pollutant materials in industrial wastes had never before required treatment before being dumped, the Commission was authorized to set up a scientific laboratory to help industries find methods of economically and efficiently eliminating their danger of pollution.

To locate sources of pollution the Commission has a number of field men who take samples of water from lakes, rivers, streams, sewer outlets, industrial outlets, etc. These samples are then labelled and sent to the Commission's laboratory where scientists determine if the water is polluted, the type of pollution, and if the degree of any type of pollution is more than is allowed by the water quality objectives set by the Commission. If it is, the Commission informs the offender and requests that the condition causing the pollution be remedied.

One of the most important jobs of the Commission is to protect the Canadian sides of the Great Lakes from pollution. In this it co-operates with the U.S.-Canadian International Joint Commission, one of whose responsibilities is to see that sufficient measures are taken on both sides of the border to prevent pollution on all boundary waters.

In this regard the OWRC recently completed an intensive sampling of the waters along the Ontario shore of Lake Ontario from Hamilton to Toronto. More than 2,000 water samples were collected and tested to ascertain what parts of the lake were polluted, the particular type of pollution, degree and probable sources of contamination.

PORTABLE PENSIONS PLAN

(Continued from Page 1)

It is anticipated that many employers who at present have no pension plan will adopt a benefit level in excess of the minimum prescribed by the Bill. The Bill also establishes standards for all benefits which exceed the minimum. Complete vesting of employer contributions and restriction of cash withdrawal of employees' contributions will be required only after an employee attains age 45 and has completed ten years' service. The vested pension relates to all service after January 1, 1965. Under the terms of the Bill, employees leaving a job may be able to withdraw in cash 25 per cent of that portion of their pension which exceeds the minimum standard. Administration of the Act will be the responsibility of the Pension Commission of Ontario. In order to facilitate transfers and accumulation of pension credits, the Bill makes provision for the establishment of a Central Pension Agency. When an employee leaves a job, his pension credits may be left with his old employer, transferred to his new employer or a retirement savings plan, or deposited in a Central Pension Agency.

In introducing the Bill, Mr. Robarts said that "the Bill offers pension arrangements which are better adapted to a world in which industry needs to be flexible and labour needs to be mobile. The pensions that people gain will not be forfeited as so many are today, an impediment to the employment of older workers will be lessened, and as time goes by there will be more and bigger incomes at retirement."

15-STORY TOWER FOR QUEEN'S PARK

Tenders will be called in June for the first stage of the \$50,000,000 complex of Government office buildings at Queen's Park. Public Works Minister Ray Connell made the announcement in the Legislature. The initial work will include underground parking, a two-storey central building and a 15-storey office tower. The development will be located on the two city blocks bounded by Bay, Wellesley, Surrey Place and Grosvenor Street. Official opening date has been set for July 1, 1967.

The second stage of the development will be an 11-storey office tower, costing approximately \$5,800,000, and is scheduled for completion 15-18 months after the first stage has been constructed.

New Science Building To Serve OAC and OVC

Public Works Minister Ray Connell has called tenders for a new \$3,000,000 Chemistry and Microbiology Building to serve the Ontario Agricultural and Veterinary Colleges at Guelph.

The Works Minister said this will be the third major science building to be erected in half a dozen years. He said a Soils Building was completed at a cost of \$1,500,000 in 1958 and, in 1960, the new Biology Building was built for \$2,850,000.

The new science building has been planned with three floors and basement and will be "U" shaped to permit easy future expansion and to simplify separation of departments.

COMBATTING WATER POLLUTION IN PROVINCE

Seeding of plot area to research effect of chemicals in control of algae growth.

The results showed that while at many places the water was of acceptable quality there was heavy pollution in certain areas. This enabled the Commission to pin-point the probable sources of contamination. However, as a bright augury for the future, every community of any size, all along Lake Ontario from Niagara-on-the-Lake to Kingston, has now either completed new sewage works or has them under varying stages of construction.

An integral part of cleaning up the Great Lakes is the Commission's program of eradicating pollution in their tributary streams in Ontario. Of these the most important are the Grand and Thames in southwestern Ontario, which several years ago were heavily polluted. However since then \$16 million has been expended or contracted for by the municipalities along their lengths for sewage works, and both are expected shortly to be free of pollution. At the same time other rivers and streams are being cleaned up by the construction of new and improved sewage works. For example, the Credit River, which flows into Lake Ontario, has recently been cleaned up by the construction of sewage works at the principal communities along its length—Streetsville, Georgetown and Orangeville.

The waters of many other lakes, rivers and streams have also been sampled and tested to find out if they were polluted. In 1961 over 190 surveys required the collection of 2,746 samples for chemical analyses and 2,828 samples for bacteriological analyses.

One of the most important surveys was made in the Muskoka Lakes in conjunction with their local Health Unit. Analyses of water were most favourable, and apart from some local sources of pollution the waters were of excellent quality.

A new system of treating domestic sewage is also enabling the Commission to provide an answer to small communities on how they can solve their sewage treatment problems at a cost they can afford. This consists of open air lagoons, dug out of the earth to a depth of three to five feet, where the sewage undergoes a regulated natural purification process. Since it is roughly estimated that one acre of lagoon is required for every hundred people, the lagoon system is feasible only for smaller communities. However since it doesn't require sewage works and no hired help, the only cost is for the land.

As an indication of the acceptance of the lagoon system the Commission has financed and built lagoons for eight communities and has another forty or fifty being considered by municipalities. It is expected more communities will want to utilize them when it is better realized they are not only inexpensive but have no nuisance-value.

A recent amendment to the OWRC Act has enabled the Commission to plug another source of pollution. This amendment states it is now illegal to add any substance to the water of any well, lake, river, pond, spring, stream, reservoir or water course for the purpose of killing or affecting plants, snails, insects, fish or other living matter, without a permit issued by the Commission. It is designed to protect water from possible contamination by improper use of algicides, pesticides, herbicides and other similar preparations.

Two-Way Radio Systems For Highways Districts

The Department of Highways continues to expand its programme of implementing two-way radio systems for its operating districts.

With the completion of two-way radio systems for the North Bay, Sudbury and Bancroft districts, the Department of Highways now has radio communications established in 13 of its 18 districts. They are at: Chatham, Toronto, Hamilton, Ottawa, London, Kingston, Owen Sound, Stratford, Port Hope and Huntsville. These districts are now covered by 390 mobile units in addition to the numerous fixed stations which are located at district bases and other strategic points throughout the areas serviced.

New OPP Detachment Building at Wawa

Public Works Minister Ray Connell called tenders today for a Type "B" detachment building, estimated at about \$140,000, for the Ontario Provincial Police at Wawa.

Mr. Connell said the police building would be erected on a site about two miles west of Wawa near the junction of the road leading into Wawa and Highway 17. Wawa lies about 142 miles north of Sault Ste. Marie.

Construction of this 167 by 34-foot building will be of concrete and red facing brick with roof of asphalt shingles. It will be single storey with partial basement divided into two sections—administrative and living quarters.

Official Opening Fergus Pollution Control Plant.

The completion of a new, completely-equipped scientific Laboratory in northwestern Metro Toronto has also enabled the Commission to test more water samples for pollutants and to carry out more complex research into improved methods of getting rid of industrial wastes, especially those that still pose problems. In this regard the Commission is working closely with the detergent industry to develop a detergent which hasn't the present property of causing objectionable foaming in streams.

The science of sanitary engineering is also relatively new and is advancing rapidly. Consequently as new methods and devices come into being the Laboratory's facilities will enable scientists to examine them fully to determine if their use will bring increased efficiency or economy to the Province's municipal sewage works.

In addition the Laboratory's size enables the Commission to offer courses of instruction in sewage plant operation to public utility commission's employees throughout Ontario, as well as for holding conferences on other subjects.

An important part of the Commission's work is to obtain the co-operation of municipalities, industries and individuals in the battle against pollution. To do so the Commission holds periodic conferences with representatives of municipalities, industries and interested public organizations to acquaint them with the need for combatting pollution. In this regard it invites representatives from all industries to an annual conference. It also invites representatives from all the companies in one particular industry, such as the pulp and paper industry, to a conference to discuss their common problems of getting rid of their industrial wastes in the most sanitary, economical and satisfactory manner.

In addition, the moral power and active co-operation of the public is enlisted by keeping them constantly informed on the need for the anti-pollution crusade by means of news releases, publications, pamphlets and radio and TV.

As a result of its efforts, the number of municipalities served by sewage treatment plants in operation now total 277, in comparison with 179 in 1957. The population served by these plants is approximately four million, or 66 per cent. of the population.

In addition, the number of municipalities served by water works systems in operation at the end of 1961 is 617, serving 4.5 million persons or approximately 75 per cent. of the total population.

To bring this about the OWRC, up to the end of June, 1962, has agreements with municipalities for loans of \$91,647,286, of which \$68,112,653 was for 115 sewage works projects and \$23,534,633 for 97 water works projects.

Although these results are gratifying the increasing needs of a continually growing Ontario will require that many sewage treatment facilities will have to keep pace through enlargement and modernization. For only in this way will the great natural resources of Ontario's waters be maintained in cleanliness and quality for the future health, prosperity and enjoyment of its people.

Dairy Advisory Committee To Study Problems Of Industry

Agriculture Minister W. A. Stewart has announced that George McLaughlin, well known farmer of Beaverton and second Vice-President of the Dairy Farmers of Canada, has been appointed Ontario's representative on the Canadian Dairy Advisory Committee.

The Committee, composed of representatives of the provinces of Quebec, Ontario, Manitoba and Saskatchewan, Alberta, and British Columbia, as well as a representative of the Dairy Farmers of Canada and the National Dairy Council, was established following the Canadian Dairy Conference in Ottawa in February.

Contract Awarded For Provincial Institute Of Trades At Ottawa

A \$3,538,000 contract has been awarded for construction of the new Provincial Institute of Trades at Ottawa, Public Works Minister Ray Connell has announced.

The new Trades School will be built on a 12-acre site facing on Woodroffe Ave., in Nepean Township, on the farm of Frank Ryan. It will be partly two storey and partly single storey. The day school capacity will be about 600 students.

The two storey section will face Woodroffe Ave. and will contain the main entrance lobby, administrative offices and teaching facilities for the associated academic courses.

COMING EVENTS

The Department of Travel and Publicity announces coming events in Ontario for the month of May as follows:

DATE	PLACE	EVENT
1	Preston	Doon Pioneer Village Opens
1	Windsor	Mary Day Parade
1- 2	Hamilton	Antique Show and Sale—Paardeburg Chapter, I.O.D.E.—Headquarters, Royal Botanical Gardens
1- 4	Fort Erie	Last four days of Early Spring Meet—Fort Erie Jockey Club Track
1- 4	London	Canadian Autorama Stock Car Races
1- 5	Ottawa	Exhibition of Australian Paintings—National Gallery
1- 9	South Porcupine	Porcupine Festival of Music
1-12	Ottawa	Old Master Drawings from Chatsworth—National Gallery
1-25	Campbellville	Extended Harness Racing Meet—New Mohawk Raceway (Hamilton Area)
1-31	Toronto	C.N.E. Stock Car Races—Tues. and Fri. evenings
1-July 31	Ottawa	Extended Harness Racing, Rideau-Carleton Raceway
	Cobourg	Ethnic Night Entertainment, sponsored by Rotary Club—Victoria Opera House (contact Secy., Rotary Club, for date)
May-October	Parry Sound	Scenic Panoramas of Parry Sound and Georgian Bay Islands—Observation Platform, Forest Ranger's Lookout Tower, Ranger's Gardens
2	Toronto	York Concert Society—Eaton Auditorium
2	Windsor	44th annual meeting of Canadian Manufacturers Association (Ontario Division)—Prince Edward Hotel
2- 4	Peterborough	18th Annual Ontario Recreation Association Conference—Empress Hotel
2- 4	Toronto	Registered Nurses' Association of Ontario—Royal York
3	Toronto	Fanny Birdsall Recital—Eaton Auditorium
3- 4	Kitchener	Preston Scouts House Band—Kitchener Memorial Auditorium
3- 4	Picton	Kinsmen's Club Sportsman's Show—Quinte Isle Fishing Derby
3- 4	Toronto	Second Annual Canada-Wide Science Fair—Casa Loma
3- 4	Windsor	Pilot International (District 17)—Prince Edward
3- 5	London	Ontario Federation of Printing Trades Union—Hotel London
3- 5	London	Quinte Isle Fishing Derby—\$1,500 in prizes
3- 5	Picton	Canadian National Science Fair—Casa Loma
3- 5	Toronto	Sweet Adelines (Region No. 2)—Royal York
3-June 6	London	23rd Annual Western Ontario Exhibition—London Art Museum
3-June 6	London	Imperial Oil Collection—London Art Museum
4	London	London Credit Union Chapter—Carousel Motel
4	London	Somerville Industries Sales Meeting—Holiday Inn
4	Picton	Saturday Night Fishermen's Ball, Prince Edward Yacht Club—Quinte Isle Fishing Derby Weekend
4	Toronto	Canadian Institute of Quantity Surveyors—Lord Simcoe
Wk. end of 4	Toronto	Canadian Corps Association (Dominion Command)—201 Niagara Street
4- 5	Jarvis	Deutscher A. C. Road Races, Harewood Track
4- 7	Toronto	Eastern Canadian Council B'Nai B'Rith—Seaway Towers
4, 11, 18, 25	Hamilton	Spring Nature Series—Royal Botanical Gardens
5	London	Section Meeting, Canadian Amateur Swimming Association—Y.M.C.A. and Y.W.C.A.
5	Owen Sound	Sports Car Races (GBSCC)
5- 6	London	Burman's Beauty Supply—Hotel London
5- 7	Toronto	Canadian Booksellers Association—Park Plaza
5- 8	Toronto	Association of Assessing Officers of Ontario—King Edward
5-June 15	Hamilton	Royal Botanical Gardens Displays
6	Sudbury	Tourist Hospitality Conference—Cassio's Motor Hotel
6	Toronto	Women's Canadian Club—Eaton Auditorium
6- 8	Kitchener	Annual Meeting and Educational Seminar of the Ontario Osteopathic Association
6-12	London	District 15 Optimist Club Convention—Hotel London
6- 9	Toronto	American Society of Mechanical Engineers—Exhibition Park
6-10	Toronto	National Industrial Production Show of Canada—Ex. Park
6-10	Toronto	Women's Missionary Society of the Presbyterian Church of Canada—Ewart College
6-June 1	Toronto	Spring Meet Greenwood (Old Woodbine) Track—Ontario Jockey Club
7-10	Toronto	American Chemical Society (Division of Rubber Chemistry)—Royal York
8	Fort William—Port Arthur	Tourist Hospitality Conference, Fort William—Port Arthur Region
8	London	London Health Association (TB Division)—Carousel Motel
8- 9	Etobicoke	Etobicoke Philharmonic Orchestra, Conductor: Hans Bauer—Royal York Collegiate, Royal York Rd. S.—8.15 p.m.
8-10	Brantford	Fifth Annual Glenhyrst Antique Show and Sale (Glenhyrst Art Council)—Glenhyrst Gardens, Ava Road
8-11	Toronto	National Association of Wholesale Tobacco & Confectionery Distributors—Seaway Towers
9	Toronto	Canadian Association for Production and Inventory Control—King Edward
9-10	Windsor	Victorian Order of Nurses (National)—Prince Edward
9-11	London	Alumni Business Conference—University of Western Ontario
9-11	Orillia	Annual Orillia Sportsman's Show
9-11	Toronto	Nursery Education Association of Ontario
9-11	Toronto	Toronto and District Square Dance Association—Royal York

Copper-Nickel Found North Of Heron Bay

The discovery of an extensive copper-nickel showing north of Heron Bay has triggered the biggest claim-staking spree that has been seen in the Port Arthur Mining Division for several years.

Altogether 348 claims staked during the first three weeks of March were recorded in the Port Arthur office of the Ontario Department of Mines.

Conservation Authority Gets Government Grant

A Provincial grant of \$65,837 has been approved for the Metropolitan Toronto and Region Conservation Authority. The grant has been made for the purpose of acquiring a 25-acre parcel of land at the northeast corner of Jane Street and Steeles Avenue, Toronto. By acquiring this property, the Authority will obtain a solid block of land up and down Black Creek.

The purpose of this publication is to advise the people of Ontario of the services which their Government renders. Such services are effective in the degree to which they are known and used. The contents are for immediate republication. When change of address is requested, the address as printed on a copy of the publication should be enclosed. Communications with regard to the publication should be addressed to The Director, Division of Publicity, Issued by the Division of Publicity, Dept. of Travel and Publicity, Parliament Buildings, Toronto.

ONTARIO

Government Services

—Photos by Dept. Travel and Publicity

Hon. W. Earl Rowe, Ontario's 20th Lieutenant-Governor since Confederation, was sworn in at Queen's Park on Wednesday, May 1st. Mr. Rowe was sworn in by Ontario's Chief Justice Dana Porter. Shown in the photograph (top, foreground) are, left to right, Prime Minister John Robarts, Chief Justice Dana Porter, and W. M. McIntyre, Secretary of the Cabinet (back to camera). In the photograph (bottom, seated in foreground) are Prime Minister John Robarts and Chief Justice Dana Porter. Lieutenant-Governor Rowe (standing) is shown as he makes a brief address following the swearing in ceremony.

Ontario's 20th Lieutenant- Governor

BRIDGE NAMED

Highways Minister Charles S. MacNaughton has announced that "Garden City Skyway" is the official name for the \$20 million bridge which will carry the Q. E. Way over the Welland Canal at St. Catharines. Mr. MacNaughton, in making the announcement, noted that St. Catharines has long laid claim to the title "The Garden City".

The \$20 million project, to be completed this fall, is located just to the north of the present bascule bridge nearby which now serves traffic on both the Q. E. Way and Highway 8.

Up until now the new structure has been referred to most frequently as "Homer Skyway", after the name of an old settlement at the point where the highway crossing of the canal is made. However, the community of Homer has by now pretty well lost its identity, having been absorbed by the City of St. Catharines.

NEW BRANCH IN EDUCATION

Education Minister William G. Davis has announced the establishment of the Technological and Trades Training Branch of the Department of Education. The formation of this branch has been made necessary by the rapidly increasing development of training in the province based on the Federal-Provincial Technical and Vocational Training Agreement.

The Branch will be responsible for the general supervision of the Institutes of Technology, the Institutes of Trades, Program 5 for the training of the unemployed, Program 4 for training in industry, Advanced Technical Evening Classes, and Program 8 for training for Federal Departments and Agencies. In addition to the general operation of the various institutes and programs, the Branch will provide leadership in the development of suitable curricula, standards, and grades for the various courses and the planning and organization of suitable training for the staffs of the institutes and training programs.

Colourful Booklet Outlines Ontario

The Key Word in Ontario's travel promotion program this year is "Refreshing", and it is quite prominently displayed on the front cover of the Department of Travel and Publicity's most important brochure issued in 1963.

The beautiful 4-colour well illustrated booklet is just one of many pieces of literature prepared by the Department's Division of Publicity to lure outsiders to Ontario, or make Ontario people themselves more aware of the vacation attractions of their own province.

Encouraged by the tremendous response to appeals made in previous years, authorities of the Department are again asking the people of this province to join in the promotion campaign on behalf of Ontario's tourist industry.

One way to do so is to provide the Department with the name, or names, of friends or relatives living outside Ontario and to whom you wish the above-mentioned publication sent. Simply fill out the coupon right and return it to the address indicated. It is suggested that you write your name where indicated on the last line, so that your relative or friend may be apprised that it is on account of your request that he is getting the brochure.

PUBLIC WORKS MINISTER Ray Connell has called tenders for the construction of Ontario Tourist Reception Centres at Cornwall and Prescott (Johnstown). Mr. Connell stated that the Cornwall Centre will be built close to the Cornwall-Massena International Bridge and will replace the one near the old bridge. Some 48,000 visitors received information at this centre last year between May 12 and September 16, and it is anticipated that this number will be greatly increased with the erection of the new building.

The Prescott Centre will be built at the junction of Highway 16 and the Prescott-Ogdensburg Bridge at Johnstown, some two or three miles east of Prescott, south of Highway 401. It replaces the old frame building at the ferry dock. The two Reception Centres will be similar in design.

New Highway Link Between Ontario And Quebec

The Department of Highways has taken the first step in the construction of Ontario's portion of the Macdonald-Cartier bridge across the Ottawa River between Ottawa and Hull on the Quebec side. An \$881,123.00 contract has been awarded covering the structure and approaches at Sussex Drive. This is known as Stage I in Ontario's bridge program.

Stage II, which consists of the Ontario approaches to the new bridge from Sussex Drive and King Edward Avenue, is scheduled to be awarded during the fiscal year of 1964-65.

The cost of construction in Stages I and II will be borne by the Department of Highways but, upon completion of the bridge, maintenance of structures and approaches at the Ontario end, as well as of Ontario's part of the bridge deck, will be turned over to the City of Ottawa. The main structural maintenance of the bridge itself will be carried out by the Canadian Department of Public Works, the two provincial governments each responsible for one-third of the cost. All approaches will be landscaped by the National Capital Commission.

Resulting from extensive preliminary studies, a five-span girder bridge was chosen as the most suitable, considering among other things practicability and cost.

The five spans of the bridge itself will be 290 feet—464 feet—522 feet—464 feet—and 290 feet respectively, totalling 2,030 feet between abutments. The centre span of 522 feet will be the longest of its type (Box Plate Girder), ever built in North America. The bridge will have two 40-foot roadways separated by a 4-foot median. There will be two 6-foot sidewalks.

It is estimated that some 10,500 tons of structural steel will go into the bridge proper. Estimated over-all cost, including the bridge and the two approaches, will be in the vicinity of \$12,500,000. Though the initial estimated traffic volume in each direction will be 4,000 vehicles per hour, the bridge has been designed to handle an estimated daily peak volume of 45,000 vehicles in 1980. The speed limit on the bridge will be 50 miles per hour, with ramp speeds of 30 miles per hour. An objective of some time in 1965 has been established for completion of the entire project.

FIVE-YEAR PROGRAM TO STIMULATE ECONOMY

ECONOMICS and Development Minister Robert Macaulay has announced the beginning of a five-year economic program designed to increase employment and production and employment in all sectors related to the Provincial economy. In outlining the program before the Legislature, he said that the program will concentrate on the manufacturing sector of the economy where the most jobs will be created. The program for the current year ranges from tax incentives for research to the creation of an acceptable "Made In Canada" label and special industrial merit awards.

He outlined nine policies to create a favourable environment for the expansion of manufacturing production. (1) More government support for research through introduction of tax incentives for research carried out by Ontario firms, increased grants for industrial research and development, and government participation in the multi-million dollar Ontario Research Community now being built. (2) Expansion of the \$100 million Ontario Development Agency which guarantees loans and provides financial and other advice to Ontario industries. (3) Expansion of activities of the Ontario Economic Council, through co-operation with other bodies at the federal, provincial or municipal level. (4) Special nuclear studies relative to an expanding nuclear program, involving the possible expenditure of \$500 million in Ontario in co-operation with the federal government, the Hydro-Electric Power Commission of Ontario and private industry. (5) Regular seminars with municipal industrial commissioners. (6) Special

transportation studies. (7) Ontario achievement awards to firms with success in fields of export, import replacement or the expansion of domestic production. (8) Special research and studies into such fields as national and international economics, the U.S. Trade Expansion Act and the European Economic Community. (9) Expansion of information services to acquaint manufacturers with the services available in the Department of Economics and Development.

Mr. Macaulay said the Department's efforts to replace imports by domestically manufactured components will be accelerated during 1963. This will be done by: Setting in 1963, as a goal, the bringing into Ontario of 160 new firms to manufacture in Ontario goods formerly imported. Setting in 1963, as a goal, the creation of 75 new manufacturing arrangements, whereby foreign manufacturers license for production in Ontario goods formerly imported. Holding an expanded Manufacturing Opportunities Show to display components and parts now being imported into the Province. To be held in conjunction with this show will be an exhibition and conference on new techniques, methods and products to display Canadian ingenuity to engineers, architects and others responsible for the setting of specifications in the construction of buildings and the development of new machinery. Holding a conference of purchasing agents to acquaint them with the Government's objectives in the field of import replacement and secure their assistance in achieving Ontario's economic goals. Determining ways and means by which Ontario industry can reduce costs of tooling up pro-

ducing in Ontario parts and components now imported into the Province because of the high cost of tooling. A part of this program will be the study of methods to achieve standardization and simplification of basic parts to enable Canadian manufacturers to obtain larger production runs and thus be able to compete more effectively. Establishing a consistent and acceptable "Made in Canada" label through negotiations with the Canadian Manufacturers' Association and the federal government to reach agreement on standardized Canadian content regulations.

Mr. Macaulay announced eight steps leading to expansion of exports of Canadian manufactured goods. They are: (1) Ten sales missions, with representation from 100 Ontario industries; (2) Some 25 manufacturing agencies will be established to represent Ontario manufacturers in foreign countries; (3) The Trade Crusade will be carried into five leading metropolitan U.S. cities where there is a high export-import deficit; (4) A study to be made of feasibility of a Canadian-built trade ship to go round the world advertising and selling Canadian goods; (5) A program to sell Ontario engineering services in foreign countries separately or in conjunction with the export of Ontario manufactured goods; (6) Showrooms to display Ontario manufactured goods will be established in the Government's foreign offices; (7) The government will press federal authorities to take action in line with suggestions made by Ontario to the Royal Commission on Banking and Finance for better export credits for manufacturing firms to promote export sales, particularly to the United States.

COMING EVENTS

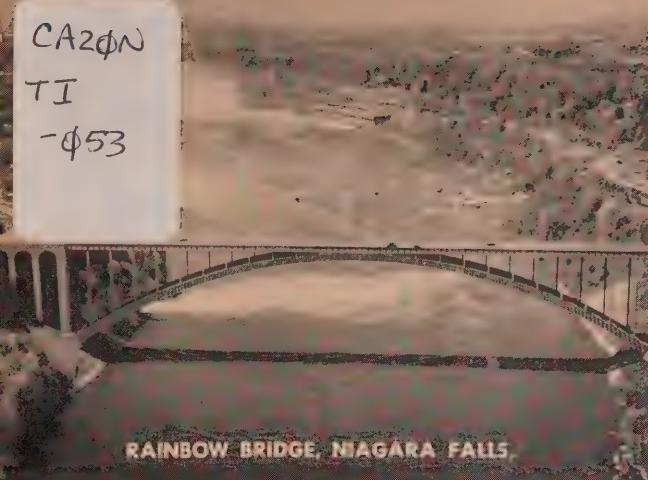

The Department of Travel and Publicity announces coming events in Ontario for the month of June as follows:

DATE	PLACE	EVENT	DATE	PLACE	EVENT
1	Elliot Lake	Official opening Nuclear Age Museum	15	Toronto	Second annual Rodeo—Department of Highways of Ontario parking area, Highway 401 and Keele St.
1	Guelph	Field Day, Ontario Goat Society, Animal Husbandry Building, Ontario Agricultural College—Registration 11 a.m.	15	Toronto	Rita Saward Recital—Dance Recital—Eaton Auditorium
1	London	Western Ontario X-Ray Technicians Convention—Hotel London	15	Toronto	Open Regatta—National Yacht Club
1	Mosport	Players 200 (BEMC-CRDA)	15-16	Windsor	Windsor Daily Star—Annual Dinner—Clearay Auditorium
1	Peterborough	Harness Racing	15-16	Beardmore	Seventh Annual Lake Nipigon Fish Derby
1	St. Catharines	Canadian Schoolboy Rowing Championships (CAAO)	16	London	Forest City Flyers Radio Control Contest
1	Windsor	Metropolitan General Hospital, Graduation Ceremonies—Clearay Auditorium	16-17	London	Annual Gymkhana (WOSCA)
1	Windsor	Youth for Christ Rally—Clearay Auditorium	16-18	Brantford	Indian John Memorial Shoot (Archery)—Brant Bowmen's Club property, Onondaga Township
1-2	Larder Lake	Annual Lions Club Fishing Derby	16-19	Toronto	Canadian Orthopaedic Association—Royal York
1-2	Toronto	University of Toronto Newman Club celebrates its Golden Jubilee. Anniversary celebrations at U. of T. Newman Club. For further details check: Golden Jubilee Committee, Newman Club, 89 George St., Toronto—WA 2-3230	16-19	London	Canadian Federation of Biological Societies—University of Western Ontario
1-9		National Golf Week	17	Toronto	American Leather Chemists Association—Sheraton-Brock
3-5	Toronto	Canadian Postmaster's Association—Ontario Branch—King Edward	17-19	Port Arthur	Rebekah Assembly of Ontario—Royal York
3-5	Waterloo	Seminar on Field-Sales Management, Institute of Marketing—University of Waterloo	17-21	Toronto	University of Toronto, School of Business, Seminar on business in a changing society
3-8	Toronto	Canadian Ophthalmological Society—Royal York	17-21	Toronto	Ontario Flour Millers Association—King Edward-Sheraton
3-8	Toronto	Canadian Otolaryngological Society—Royal York	17-Sept. 28	Stratford	Ontario Traffic Conference
3-July 18	Malton	Thoroughbred Racing meets at Woodbine with seventeen stakes including Canadian Oaks, June 8 (\$37,000); Queen's Plate, June 15 (\$75,000); Dominion Day Stakes, July 1 (\$30,000); Canadian Maturity Stakes, July 6 (\$20,000).	17-Sept. 28	Stratford	American Institute of Electrical Engineers—Royal York
4	Agincourt	North Toronto Chapter of Professional Engineers—Tam O'Shanter Golf and Country Club, Agincourt. Time: 7:00 p.m. Speaker: Scott Young. Cost: \$3.50. Also golf and bowling, etc.	18-Sept. 24	Toronto	Independent Order of Odd Fellows—Grand Lodge of Ontario—Royal York
4	Windsor	Municipal Finance Officers of United States and Canada, Luncheon Meeting—Skyline Room, Clearay Auditorium	19-23	Toronto	Annual Stratford Shakespearian Festival
4-6	Toronto	Canadian Manufacturers' Association—Royal York	20	Ottawa	"Canada on Canvas"—exhibition of Canadian Landscape Paintings from 1900—Present—Festival Arena
4-8	Toronto	Canadian Cleaners and Launderers Allied Trades Association Exhibition, Industry Building, Exhibition Park	20-22	London	Poultry Industrial Conference and Show—Western Fair Grounds
5	Belleville	Official Opening of Belleville Water Pollution Control Plant—Plant Grounds on the Lakeshore Road, 2:30 p.m.	20-22	Maxville	Toronto—Stratford Toronto Telegram Weekly Shakespearean Festival Party—rail and theatre tickets and dinner. Contact The Telegram, Bay and Melinda, Toronto, for details
5	Toronto	General Assembly of the Presbyterian Church in Canada—Knox Church	20-23	Toronto	Annual Council Meeting of Canadian Federation of University Women—University of Toronto
5-7	London	Manufacturers Life Sales Seminar—Carousel Motel	21	Welland	RCMP Band Concert—Vincent Massey Park
5-7	London	Naval Officers Association of Canada Convention—Hotel London	21-23	Barrie	London Horticultural Society and London Rose Society—Flower Show, Wellington Square Mall
5-7	Toronto	Performance Registry International—Royal York	22	Toronto	Kenyan Agricultural Society—RCMP Musical Ride is featured
5-8	Chatham	Jaycee Fair and Home Show—RCMP Musical Ride is featured	22	Brantford	Kappa Beta Pi Legal Sorority—Royal York
6	Toronto	Robertson School of Dancing—Eaton Auditorium	22	Brockville	Rose Festival
6-7	Windsor	Association of Municipal Electrical Utilities of Ontario—Prince Edward	22	Haliburton	Harness Racing
6-8	Carleton Place	Annual 7-mile Road Race and Sports Weekend	22	Hamilton	Beta Sigma Phi—Royal York
6-8	Stoney Creek	Festivities celebrating 150th anniversary of battle of Stoney Creek. Events include official opening of Stoney Creek Battlefield Park; military displays; fireworks; attendance of prominent dignitaries from all levels of Canadian and United States Governments	22	Kitchener-Waterloo	Glynhurst Summer Festival—Handicrafts, art, folk songs, theatricals
6-8	Toronto	Canadian Physiotherapy Association—Park Plaza	22	Peterborough	Eastern Rowing Association Regatta
6-8	Toronto	Chemical Institute of Canada—Royal York	22	St. Catharines	Haliburton Highlands Landscapes by M. L. Bonkalo—United Church Hall
6-9	London	Press Institute of Canada—University of Western Ontario	22	St. Catharines	Mount Hamilton Horticultural Society: Pageant of Flowers, 1-6 p.m. at Ontario Hospital Grounds
7	Toronto	Louise Goldsmith School of Dancing—Eaton Auditorium	22	Toronto	Band Land Pageant—Victoria Park, Kitchener Trumpet Band
7	Windsor	Association of Municipal Electrical Utilities—Conference and Luncheon—Clearay Auditorium	22	Toronto	Harness Racing
7-9	Toronto	Canadian Academy of Allergy—Park Plaza	22	Honey Harbour	Annual Soap Box Derby
7-July 2	London	Leonardo da Vinci Drawings, London Art Museum J. E. H. MacDonald: 1873-1932, London Art Museum	22	Toronto	Second Annual German Canadian Field Day
8	Barrie	Harness Racing	22	Toronto	Open Regatta—Royal Canadian Yacht Club
8	Peterborough	Harness Racing	22	Toronto	Toronto—Niagara Falls—Crystal Beach: Canadian National Steam Engine Lovers Excursion
8	Toronto	Dennis Moore—Dance Recital—Eaton Auditorium	22	Toronto	Field Day and Fete (Irish dance competitions), sponsored by Associated Irish Societies—East York Stadium
8	Woodstock	Dairy Day	22	Ingersoll	Oxford County Rose Festival
8-9	London	Canadian Union of Operating Engineers—University of Western Ontario	22	Rockwood	Royal City Motorcycle Hillclimb
9	Belleville	Open House for Belleville area residents re: Belleville Water Pollution Control Plant, 1-6 p.m.	22	Honey Harbour	Tenth Ontario Industrial Waste Conference
9	Niagara Falls	Canadian Corps Pilgrimage Parade of Canadian World War Veterans—Niagara Falls, Ontario to Niagara Falls, New York	22	Toronto	45th Annual Convention of Optimist International—Royal York
9	Toronto	Toronto-Palmerston—Canadian National Railways Steam Lovers' Excursion	22	Toronto	Industrial Management Clubs—University of Western Ontario
9	Windsor	Hotel Dieu School of Nursing—Graduation Ceremonies—Clearay Auditorium	22	Toronto	Harness Racing
9-11	Niagara Falls	Ontario Commercial Travellers Association—Sheraton-Brock	22	London	Diana V. Vors—Recital—Eaton Auditorium
9-12	Niagara Falls	Foster Advertising Association of Canada—Sheraton-Brock	22	Port Arthur	Sons of Scotland Benevolent Association—King Edward
9-13	Toronto	Commonwealth Broadcasting Conference—Royal York	22	Kingston	Optimist International—Royal York
9-14	Toronto	Carmen Salesmen Ontario Market—Royal York	22	Ottawa	Le Semaine Francaise "French Week"—Week of festivals, square and folk dances, classical and folk music, dramatic presentations, parades, reviving French-Canadian traditions and way of life
9-15	London	Canadian Chamber of Commerce Management Seminar—University of Western Ontario	22	Peterborough	Zenith Radio Company Exhibits—Holiday Inn (At Hwy. 401)
9-15	Toronto	Ontario Medical Association—Royal York	22	St. Catharines	Federation of Canadian Music Festivals
10	Toronto	Canadian Medical Association—Royal York	22	Toronto	Limestone City Lawn Bowling Tournament
10	Agincourt	Willowdale-Thornhill Chapter of Professional Engineers—Place: Tam O'Shanter Golf and Country Club, Agincourt—Golf Tournament. Also banquet in evening.	22	Toronto	RCMP Band Concert, Supreme Court Building
10	Toronto	Toronto-Hamilton C.N.R. "Student's Choo-Choo," Junior Railway Steam Engine Lovers	22	Toronto	Harness Racing
10-15	St. Thomas	Kiwanis Club of St. Thomas—RCMP Musical Ride is featured	22	St. Catharines	St. Catharines Kiwanis Annual Horse Show
10-July 5	London	Children's Art Exhibit—London Art Museum	22	Toronto	RCMP Band Concert—Vincent Massey Park
12	Oakville	Antique Auto Show	22	Owen Sound	Annual Rose Show
12	Ottawa	RCMP Band Concert—Supreme Court Building	22	Toronto	Doreen Hayes—Dance Recital—Eaton Auditorium
12	Toronto	Baltic Federation in Canada Concert—Eaton Auditorium	22	Toronto	International Freedom Festival, Luncheon—Clearay Auditorium
13	Ottawa	RCMP Band Concert—Vincent Massey Park	22	Toronto	Dedication of new Lewiston-Queenston Bridge, taking place at Bridge Plaza on Canadian side
13	Pembroke	Ottawa Valley Trade Fair	22	Toronto	State Farm Mutual Automobile Insurance Co., Canadian Division, Convention, Celebrating 25th Anniversary of Co. in Ontario—Skyline Motel
13	Toronto	Mollie McGregor—Dance Recital—Eaton Auditorium	22	Toronto	International Freedom Festival—Clearay Auditorium

STONEY CREEK BATTLEFIELD PARK CEREMONIES

On June 6, an historical plaque commemorating the Battle of Stoney Creek was unveiled at the Stoney Creek Battlefield Park. This plaque is one of a series being erected throughout Ontario by the Department of Travel and Publicity, acting on the advice of the Archaeological and Historic Sites Board of Ontario. Participants in the ceremony included, left to right, Hon. Charles Daley, Chairman of the Niagara Parks Commission; His Worship J. W. Watson, Mayor of Stoney Creek; The Right Honourable Lester B. Pearson, Prime Minister of Canada; Prof. J. M. S. Careless, Vice-Chairman of Ontario's Historic Sites Board; Mr. J. R. Sams, M.P. (Wentworth); and His Excellency W. Walton Butterworth, United States Ambassador to Canada.

Stoney Creek Battlefield Park was officially dedicated as a National Historic Site, during the ceremonies marking the 150th anniversary of the Battle of Stoney Creek in the War of 1812. The supervision and administration of the Park comes under the jurisdiction of the Niagara Parks Commission.

WORLD PLOWING MATCH

OCTOBER 8-12

The World, Canadian and Ontario championship plowing contests will be held Tuesday, October 8-Saturday, October 12, 1963, on the Conn Smythe Farms, Highway No. 10, at Caledon.

This is the first occasion in which all three championships will have been held at one time and in one jurisdiction or country, and it will probably not occur again for some twenty years. Entries in the world event are expected from some nineteen countries including Holland, Hungary and Yugoslavia. The program is being worked out by various committees in conjunction with the Canadian Plowing Council, the World Plowing Council and Mr. F. A. Lashley, Director, Agricultural and Horticultural Branch, Ontario Department of Agriculture. A display model, depicting the event, shown in the picture, left, is on view on the Main Floor, Parliament Buildings, Toronto. The famous event will feature a horse show, historical exhibits, floral displays, daily parades, and the biggest display of farm machinery in Canada.

MINIMUM WAGE LAW NOW IN EFFECT

Ontario's Minimum Wage Law became effective June 30th. At present the minimum wage program applies to the cities of Hamilton, Oshawa and Toronto; the towns of Ajax, Aurora, Burlington, Dundas, Leaside, Milton, Mimico, Newmarket, New Toronto, Oakville, Port Credit, Richmond Hill, Stoney Creek, Streetsville, Weston and Whitby; the villages of Forest Hill; Long Branch; Markham, Pickering, Stouffville, Swansea, Waterdown and Woodbridge; the townships of Ancaster, East Flamborough, East Whitby, East York, Etobicoke, Markham, Nelson, North York, Pickering, Saltfleet, Scarborough, Toronto, Trafalgar, Vaughan, West Flamborough, Whitby, Whitchurch and York.

Labour Minister Leslie Rountree has announced that orders covering the remainder of the province will be issued after a study of conditions in other areas is completed.

The Program requires that male employees be paid at least \$1.00 an hour. Female employees are to be paid at least 85c. an hour (effective June 30th); 90c. an hour from September 30, 1963; 95c. an hour from December 31, 1963; \$1.00 an hour from March 31, 1964. In relation to overtime, regular minimum rates apply. The minimum wage scale for construction workers is \$1.25 per hour.

Where the Minimum Wage Program applies to hotels and restaurant employees, male employees are to be paid at least \$1.00 per hour. Female employees start with a minimum of 85c. an hour (effective June 30, 1963), increasing to 90c. an hour from September 30, 1963 to 95c. an hour from December 31, 1963 and to \$1.00 an hour from March 31, 1964.

A restaurant employee can deduct the value of meals from earnings up to a maximum of 50c. per meal, or a total of \$10.00 per week, providing the employee has actually eaten the meals.

The Program includes employees under 18 years of age. If they are regular members of the "labour force" they are entitled to the same minimum as other employees. If they are students who only work part time, or if they are messengers, delivery boys or news vendors, their minimum rate is 80c. an hour.

If an employee is called in for less than a full day, he must be paid the minimum rate for at least three hours' work. If he works for a longer period, he must be paid for each hour. Complete details of the Minimum Wage Program are available to employers and employees at the Department of Labour, Parliament Buildings, Toronto.

REVIEW OF E.M.O.

Attorney-General Fred M. Cass recently announced that an extensive review will be made of Ontario's Emergency Measures Organization, with a view toward providing a more effective survival program.

Mr. Cass said that the review emanates from legislation passed at the last session of the Legislature. Amendments to the Emergency Measures Act call on municipalities to make plans for the continued operation of local government and essential services in the event of an emergency. Mr. Cass expressed the hope that the review, which will be conducted by Ontario Fire Marshal M. S. Hurst, will result in more effective leadership to municipalities and the general public, concerning steps to take in the event of a national emergency.

Rules Govern Algae Control

The fact that persons wishing to apply a chemical or other substances to control algae and other aquatic plants must first obtain a permit from the Biology Branch of the Ontario Water Resources Commission is re-emphasized in a booklet "Aquatic Plant and Algae Control" published by the OWRC. Issuance of such permits began in 1962.

It is pointed out that acquisition of a permit does not divest any individual or commercial applicator from the responsibility for any undesirable consequences arising from a treatment. Anyone applying any substance without the authority of a permit, or who violates the terms and conditions provided in a permit, is guilty of an offence under the Ontario Water Resources Commission Act and upon summary conviction is liable to a fine not exceeding \$500.00.

FILMS ON FIRE

A 55-page booklet, containing a list of 16mm films on fire prevention and extinguishment, has been issued by the Office of the Fire Marshal. In 1949 some 18 films were available. Today the Film Library offers 300 titles.

An indication as to the value of the Film Library at the Fire Marshal's Office is to be found in statistics which shows the average yearly audience for film showings all over the Province. This totals over a quarter million people and includes fire departments, industrial fire brigades and safety staffs, municipal councils, schools, institutions, hospitals, church groups, service clubs and many other groups which have received films free on request from the Fire Marshal's Office.

Film Library policy states that films are to be used exclusively for education purposes in connection with the training of fire departments or the creating of fire consciousness within a municipality. They will be supplied only on the order of a responsible party residing in Ontario. No charge is made by the Fire Marshal's Office for use of the films.

Ontario Food Council

Acting under legislation passed at the last session of the Legislature which established the Ontario Food Council, Agriculture Minister W. A. Stewart recently announced that five well-known Ontario people, representing the various segments of the industry and the consumer, had been appointed to the Council.

Under the Chairmanship of D. B. Williams, former Director of the Ontario Farm Products Inspection Branch, the Council will be composed of Dr. John Brown, Secretary of the Ontario Fruit & Vegetable Association; George McLaughlin, well-known dairy farmer, representing the producers; J. Douglas Small, President and General Manager of the Schneider Meat Packing Company, representing the processors; Ray D. Wolfe, President of Oshawa Wholesalers, representing the distributors; and Mrs. A. Volpe, President of the Ontario Section of the Canadian Consumers Association, representing the consuming public.

Announcing the appointments to the Council, Mr. Stewart said that he felt the Council would give early consideration to the problems of the fruit and vegetable industry. He emphasized that anything which has a bearing on the production, processing, distribution and handling of agricultural food products will be within the jurisdiction of the Council.

PUBLIC WATER SUPPLY MAY BE DEFINED

Under the amendment to the Ontario Water Resources Commission Act passed at the last session of the Legislature, the Commission "may define an area that includes a source of public water supply." This means it may set out boundaries for an area which includes a public water supply source in order to protect that supply.

When an area is defined, no person shall swim or bathe in the water supply source in that area, and no one shall place, deposit, discharge or allow to remain material of any kind in that water which may impair its quality.

Further, no act shall be done and no water shall be taken that may unduly diminish the amount of water available in such an area as a public water supply. The municipality or person with a right to use the water from such source for the purpose of a public water supply shall give notice of the area so defined by publication, posting or otherwise as the Commission deems necessary for the protection of that particular water supply.

Any person who contravenes any of these regulations will be considered guilty of an offence, under the Act, and on summary conviction is liable to a fine of not more than \$1,000 or to imprisonment for a term of not more than one year, or to both.

Another amendment concerns the section of the Act which requires that anyone wishing to take more than 10,000 gallons of water a day from any source must first obtain a permit from the OWRC.

Flood Control Dams Under Construction

A dynamite charge set off recently by Lands and Forests Minister A. Kelso Roberts initiated the official beginning of construction on the first of 13 flood control dams and reservoirs which will ring the 1,000-square-mile Metropolitan Toronto region by 1972.

First dam to be built is the Claireville dam, five miles west of Woodbridge on the west branch of the Humber River. Cost of the dam and about 1,000 acres of land surrounding it will be approximately \$2.6 million. The Claireville dam is expected to be completed by the end of next year. It will create a permanent, 120-acre lake which can be utilized as a public recreational activity.

The dams and reservoirs are being built by the Metropolitan Toronto and Region Conservation Authority for both flood control and water conservation purposes, and are designed to ward off any disastrous floods, similar to the one which followed in the wake of Hurricane Hazel nearly nine years ago.

The 10-year flood control and water conservation scheme will cost approximately \$39,000,000. Cost is being shared by the Federal and Provincial Governments and the Authority. The program calls for construction of dams, reservoirs, channel improvements and acquisition of more than 7,000 acres of land in Metro Toronto and surrounding municipalities.

ROAD MILEAGE IN ONTARIO

Total road mileage in Ontario is 85,830 which breaks down as follows: King's Highways 9,317 miles, secondary highways 2,547 miles, county roads 9,492 miles, roads in organized townships 50,962 miles, roads in unorganized townships 4,649 miles, metropolitan roads 303 miles, city, town and village streets 8,557 mileage. Additional fractions to the above figures bring the total to 85,830 miles.

COMING EVENTS

The Department of Travel and Publicity announces coming events in Ontario for the months of July, August and September as follows:

DATE	PLACE	EVENT
JULY		
1	Actinolite	Dominion Day Maddo Art Centre—Canada Day Art Festival, No. 7 Highway East of Maddo
1	Delhi	Canada Day Festival—RCMP musical ride—2 mile parade of floats and other events
1	Embro	Annual Zorra Highland Games
1	Frankford	Dominion Day Races—Stock and Racing Outboards (TORC-CBF)
1	New Hamburg	Dominion Day Half-Mile Track Races—Blue Diamond MC
1	Kingston	Dominion Day ceremonies at Old Fort Henry with special demonstrations by Fort Henry Guard
1	Perth	Annual Dominion Day Junior Bass Fishing Derby, sponsored by Rotary Club
1	Sault Ste. Marie	Annual Dominion Day Canoe and Rowing Regatta—St. Mary's Boat Club
1	Toronto	Annual Dominion Day Canoe and Rowing Regatta at Toronto Island (CCA-CAAO)
1	Toronto	Final leg of Queen's Cup Race, Youngstown to Toronto—4 & 8 CCA'S; Nanton Cup; LOR Cruisers (RCYC Finish)
1	Toronto	Hawgood Trophy Race—Dragons—Lake Course (RCYC)
1	Toronto	Final LSSA events—Lightnings, International 14s, Fireflies (RCYC)
1	Vermilion Bay	Annual Eagle Lake fishing derby
1-2	Elliot Lake	Tenth Birthday celebrations and Summer Carnival
1-4	Windsor	International Freedom Festival—parades, concerts, exhibits, fireworks
1-6	London	Last six nights of extended harness racing meet—Western Fair Grounds
1-6	Muskoka	Muskoka Lakes Tennis Championships—Cleveland House
1-12	Toronto	High School Teacher Preparation Course in Driver Training, Ontario Safety League, 208 King St. W.—Course Director: Amos E. Neyhart, Pennsylvania State University
1-13	Malton	Horse Racing: Last 12 days of early meet at Woodbine Track, Malton, Metro Toronto. Stakes include: July 1, Dominion Day Stakes, \$25,000; July 4, Clarendon Stakes, \$7,500; July 6, Canadian Maturity Stakes, \$10,000; July 13, Toronto Cup, \$10,000; and Victoria, \$7,500
1-31	Ottawa	Extended night racing meet at Rideau-Carleton Raceway (CTA)
1-31	Toronto	70-night extended harness racing meet at Greenwood Raceway
1-Sept. 1	Perth	Perth Museum Inc., Perth—open to public
1-Sept. 2	Ottawa	Changing of the Guard ceremony—10 a.m. daily—at National Parliament Buildings
1-Sept. 28	Stratford	11th annual Stratford Shakespearean Festival—Repertoire: Troilus and Cressida; Cyrano De Bergerac; Comedy of Errors; Timon of Athens
2	Windsor	Dedication Ceremony: Plaque commemorating siege of Detroit (1763) by Indian Confederacy led by Chief Pontiac
2-4	Guelph	4-H week—Ontario Agricultural College
2-5	London	Dominion Electrophome Model Show—Carousel Motel
2-5	Ottawa	Summer Theatre Festival: Noel Coward's "Private Lives"—Lakeside Summer Theatre, Lakeside Gardens
2-5	Toronto	Tely Junior Ontario Public Parks Tennis Championship Finals—c/o Helen Burke, Toronto Telegram, Bay at Melinda
2-6	Toronto	Modified and Hobby Class Stock Car Races—Exhibition Park—Tuesdays and Friday evenings
2-12	Guelph	Fish Hatchery Managers School—Ontario Agricultural College
2-19	Guelph	Course in Programme Planning—Ontario Agricultural College
2-Aug. 2	Guelph	Summer School in Physical Education—Ontario Agricultural College
2-Sept. 2	Toronto	Toronto-Stratford: Toronto Telegram's Tuesday Shakespearean Festival Theatre parties. Contact Mrs. I. Rath, Toronto Telegram, Bay and Melinda, Toronto, for details
3	London	Women's Institute of London—Meeting—Holiday Inn (Auditorium)
3	Peterborough	Liftlock Lawn Bowling Tournament
3-4	Fort William	Fort William Arts Club conducts "Arts Fair"—features art work, weaving and crafts—Patterson Park, adjoining Tourist Bureau
3-6	Toronto	Canadian Open Championship—Scarborough Golf Club, Scarborough, Metro Toronto
3-7	Toronto	Pan Macedonian Convention—King Edward Sheraton
3-31	Peterborough	Harness Racing Meets—Wednesday and Saturdays (CTA)
3-Sept. 2	Kingston	Old Fort Henry—Fort Henry Guard performs "Retreat" ceremony each Wednesday evening at sunset. Other military demonstrations are carried out daily, including changing of sentries—periodically
3-Sept. 7	Lake of Bays	Capri Water Skiing School—Bigwin Inn (Lake of Bays)—Ted Morris, Chief Instructor—Clinics
4	London	Stereo Music (Children's Play—"Simple Simon") in case of rain on July 3—Kiwani's Memorial Bandshell—Victoria Park
4-5	Copetown	Ontario Junior Girls' Championship—Beverley G.C., Copetown (Hamilton)
4-6	Toronto	Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America—Royal York
5-6	Kitchener	Canadian German Summer Festival—Memorial Auditorium
5-7	Owen Sound	International Duplicate Bridge Tournament
5-31	London	Canadian Wilderness—London Art Gallery
5-Aug. 17	Stratford	9th Annual Festival of Music—1963—Summer feature: "The Mikado"; Gilbert and Sullivan's famous light opera. Directors: Norman Campbell and Louis Applebaum—weekday evenings except Sundays and Mondays; matinees, Wednesdays and Saturdays
5-Aug. 30	London	Yugoslav Mediaeval Frescoes—London Art Gallery
6 (T)	Brantford	CASA Outdoor Swimming Championships—Earl Haig Pool, Lions Pool
6	Dunnville	Stock and Racing Outboards (DYC-CBF)
6	Kitchener	University of Waterloo engineering convocation
6	London	London Rowing Club Summer Regatta (CORA)
6	Mosport	Canadian International Grand Prix (BEMC)
6	Ottawa	Eastern Rowing Association Championships (CASO)
6	Sudbury	City of Sudbury Water Sports Regatta—Ramsey Lake (CCA)
6	Toronto	Island Yacht Club Open—Lake Course—4 & 8 CCA, 8 & 6 metre stars, Dragons, LOR Cruisers 1 Lightnings, International 14s, Fireflies
6	Toronto	Toronto-Aurora: Railway steam lovers excursion to Aurora, in conjunction with Aurora centennial
6	Tweed	Official Opening of new location and new buildings of Mary and Roman Schneider School of Fine Arts. Guest Speaker: Travel and Publicity Minister Bryan L. Cathcart
6-14	Toronto	Belfast Girls' Pipe Band from Belfast, Ulster—Sponsored by Birchcliff L.O.L. 2856, Scarborough, Metro Toronto. The purpose of this publication is to advise the people of Ontario of the services which their Government renders. Such services are effective in the degree to which they are known and used. The contents are for immediate republication. When change of address is requested, the address as printed on a copy of the publication should be enclosed. Communications with regard to the publication should be addressed to The Director, Division of Publicity. Issued by the Division of Publicity, Dept. of Travel and Publicity, Parliament Buildings, Toronto.

HIGHWAY 500 EXTENDED

Highways Minister Charles S. MacNaughton has announced the extension of Highway 500 from McArthur Mills to Denbigh on Highway 41. The Department has taken over 21 miles of existing roads between Denbigh and McArthurs Mills. A direct link has now been provided between Bancroft and Renfrew via Provincial Highways and, also, a new choice of routes between Bancroft and points in the Pembroke area.

The Department of Highways has over a period of years expended more than \$324,000 in the reconstruction of the mileage being assumed. The work was done in stages under what is known as the Development Road Program in which the Department pays for 100 per cent of the cost of such construction.

BOOKLET ON APPRENTICESHIP

The Apprenticeship Branch, Department of Labour, has issued a booklet entitled "Apprenticeship in Ontario". It contains the provisions of the Apprenticeship Act, information on qualifications for apprenticeship, technical training for the apprentice, benefits to the employer and rates of wages for apprentices in trades under certain categories. The 20-page booklet is well illustrated with pictures covering various trades including plumbing, carpentry, painting and decorating, plastering and steamfitting.

Copies of the booklet may be obtained free of charge by writing to The Apprenticeship Branch, Department of Labour, 8 York Street, Toronto.

IN BRIEF

A public information centre has been opened at the Nuclear Power Demonstration Station (NPD) near Rolphont, Ont., the Atomic Energy of Canada Limited and Ontario Hydro, sponsors of the centre, announce.

Canada's first nuclear power station, the NPD plant has been producing electricity for nearly a year. The successful operation of the plant has attracted widespread interest not only in Canada but also in many other countries.

The information centre is expected to attract thousands of visitors. A similar centre operated by Atomic Energy of Canada Limited and Ontario Hydro at the Douglas Point Nuclear Power Station on Lake Huron has been visited by nearly 100,000 people since the centre opened in 1961.

Films and panels of simplified diagrams will be used to explain to visitors the principles of operation of the NPD station. A staff of three guides will be on duty to answer questions and to conduct tours of the information centre.

NPD was built as a co-operative project of Atomic Energy of Canada Limited, Ontario and Canadian General Electric Company Limited. The plant, which has an electrical output of 20,000 kilowatts, is a prototype for larger plants, such as the 200,000 kilowatt Douglas Point Nuclear Power Station.

LIBRARY

VOL. 14

TORONTO, OCTOBER 1, 1963

No. 7

CENTRAL HEALTH LAB.

Tenders were called recently for the new Central Health Laboratory to be built on Highway 401 between the Islington Avenue cloverleaf and the Ontario Water Resources Commission building on the banks of the Humber River. The new health laboratory, which will cost more than \$6,000,000, will be the first permanent home the Central Laboratory will have had since its founding as a public service 75 years ago.

The primary function of this laboratory will be to provide comprehensive laboratory service for hospitals and doctors in private practice, independent of other available laboratories, in the Metropolitan Toronto area. It will also be the headquarters for a province-wide network of regional government laboratories.

The project, shown left, will consist of a laboratory and an auditorium wing joined together by a link containing the main entrance. It will have a basement, three floors of laboratories, and a large penthouse housing the bulk of the complex air conditioning system. The auditorium wing will contain at the basement level a large garage for shipping and receiving and at the first floor level, a 320-seat auditorium, staff lounge and a 200-seat cafeteria with adjacent servery and kitchen. The approximate floor space of this complex is 174,600 square feet. The laboratory will be sheathed in a screen of glare and heat reducing grey glass.

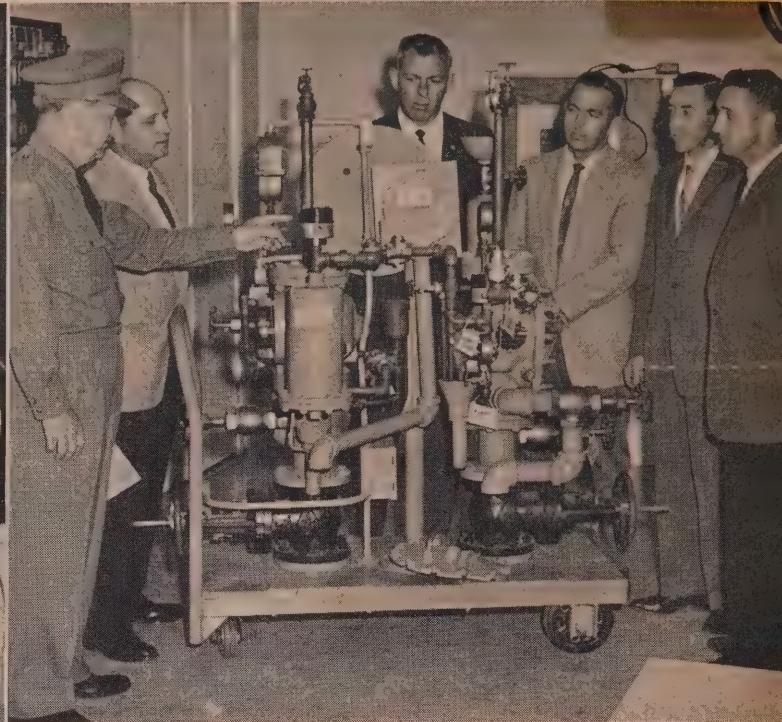

WORLD PLOWING MATCH

On October 8-12 inclusive the World, Canadian and Ontario Championship plowing contests will be held on the Conn Smythe Farms, Highway No. 10 at Caledon. Activities, similar to those shown in the photograph, left, will attract the interest and attention of a great many people from near and far. Those responsible for arrangements of this outstanding event are anticipating crowds of approximately 30,000 a day for the five-day contest.

This occasion marks the first time in which all three championships will have been held simultaneously and in one jurisdiction or country. The first world plowing contest was held ten years ago when participants from 11 countries met near Cobourg. Entries in this year's event are expected from some 19 countries including Yugoslavia, Hungary and Holland. The World Plowing Contest will be held in conjunction with the 50th Ontario International Plowing Match and the Canadian Plowing Championships. Demonstrations of various types of farm machinery and implements, exhibitions of products for farm and home consumption, events of particular interest to the women, and attractions for the younger folk will provide interest for all members of the family.

Publicity will be given through press, radio and television. Extensive magazine coverage is also being arranged. Additional information, for those wishing more details, may be obtained by contacting the Agricultural and Horticultural Societies Branch, Ontario Department of Agriculture, Parliament Buildings.

MODERN METHODS AND EQUIPMENT

Fire Chief Cliff Campbell, of the College staff, demonstrates proper method of wearing breathing apparatus to students.

Chief Instructor Ralph Leonard shows five students parts of sprinkler valve system in demonstration room in the main building.

2,000 Students Have Attended OFC Since Its Opening In 1958.

A casual fisherman trolling in the southernmost inlet of Lake Muskoka just outside of the town of Gravenhurst probably would be surprised if he saw a large, red fireboat shooting streams of water into the air while cruising slowly by. His curiosity would be stirred all the more if, on shore, he saw several red fire trucks approaching a three-storey concrete block building belching black smoke and apparently on fire.

What he has been watching, without realizing it, is a training exercise for fire department officers at the Ontario Fire College, a division of the Fire Marshal's Office in the Department of the Attorney-General. The Fire Marshal's Office operates one of the best equipped and most modern fire training centres in the whole of North America.

Set back among the trees on 92 acres of beautiful waterfront property, the college consists of 12 buildings, including sleeping quarters for students and instructors, dining room, administration building and lecture halls. Special

structures and equipment simulate fire situations on a spacious two-acre test area on the lakeshore. Buildings and installations for this purpose include a four-and-a-half storey drill tower, smoke house, a two-and-a-half storey fire test building used for studies of ventilation and heat and smoke conditions, various types of concrete pits for instruction in fighting flammable liquid fires and an electrical transformer vault. A sprinkler test building is available for demonstrating the effect of sprinklers on various types of fire. A prototype in-harbour fire fighting craft has been introduced as a model of low cost equipment for small municipalities. All the buildings and facilities are exceedingly beneficial and advantageous for courses involving and requiring practical demonstrations.

In addition to classroom and lecture hall facilities, the College comprises two demonstration classrooms housing various cutaway models of the latest fire extinguishers and pumps, fire alarm and smoke detection systems, hydrants and breathing apparatus. There are demonstration models of sprinkler and alarm systems and telephone reporting systems. Administration courses for senior fire department officers consider the problems of fire department organization, operation and administration. Basic and advanced inspection courses examine and study fire hazards in industry, places of public assembly and institutions. Fire prevention methods to control and possibly eliminate these hazards are thoroughly discussed.

Main College Building has capacity for 30 students at one time, contains individual bedrooms, dining-room, classrooms, television and card room.

Fire officer students are practicing theories on use of water fog to extinguish oil pit fire.

USED AT THE ONTARIO FIRE COLLEGE

Students are encouraged to take part in discussions at the Fire College. While Instructor Simon Verteege watches, a student describes one method of attack against fire in a particular building with consideration to direction of wind, placement of apparatus and coverage of nearby buildings exposed to heat and fire.

—Photos by Ontario Fire Marshal

Students are reading geiger counters in radio-active shielding exercise.

The Ontario Fire College is not intended for training of recruits. On the contrary, it specializes in advanced theories and methods of administration, new equipment, testing and information which is passed on later to the lower ranks of the fire service. Practical exercises merely illustrate theories already discussed in the classroom. Textbooks and other classroom materials are supplied to students and no registration fee is charged for attendance at the college. Students who come from Ontario municipal fire departments also are provided with free lodging and board and their travelling expenses are paid to and from the college by the Government. The curricula of courses are created solely for specialized and advanced officer training.

Among this year's sixteen courses of one- and two-week duration, there are such subjects as Advanced Fire Inspection Practices; Administration for Senior Officers; Radiological Monitoring for Officers; Company Officers' Course and Fire Department Officers' Course. In the Radiological Monitoring Course students consider such matters as structure of the atom, ionizing radiation, radioactive isotopes and their use in industry, half-life and shielding, and methods of fire fighting in contaminated areas.

Although it is intended primarily for members of municipal fire departments, the college accepts applications in certain courses and in limited numbers from

industry, the armed forces and other government departments. By far the vast majority of students are from Ontario municipal fire departments. As part of the County Mutual Fire Air System in the District of Muskoka, a co-operative fire protection system among communities of each county and district in Ontario, the college possesses a powerful two-way radio installation and all vehicles are radio-equipped.

Accommodation is available for 30 students per course. Since its opening, more than 2,000 students attended the college including those in a pilot course in 1957. The Ontario Fire College was opened in Gravenhurst on August 22, 1958, as the first residential college in Canada. Of the 2,000 students, more than 98 per cent graduated with certificates indicating they had passed the required written examination in the courses attended. About 50 students have come from communities outside Ontario, including all parts of Canada and several from the United States, Bermuda, Sweden and Pakistan.

The Ontario Fire College conducted 17 courses and trained a total of 472 students during the 1962 term from the beginning of April to the end of October. Ever increasing interest and acceptance of the College is evident in the fact that officers attended from 122 municipalities in Ontario. Eighty candidates could not be accepted to courses requested, due to the fact that the courses were already filled.

Effects of fire at varying temperatures are shown to students in fire test building at Ontario Fire College. Harbour firefighting boat is shown at right of picture.

Use of harbour firefighting craft is shown to fire officer students at the College. Training tower, used for rescue work, is shown in background.

COMING EVENTS

The Department of Travel and Publicity announces coming events in Ontario for the month of October as follows:

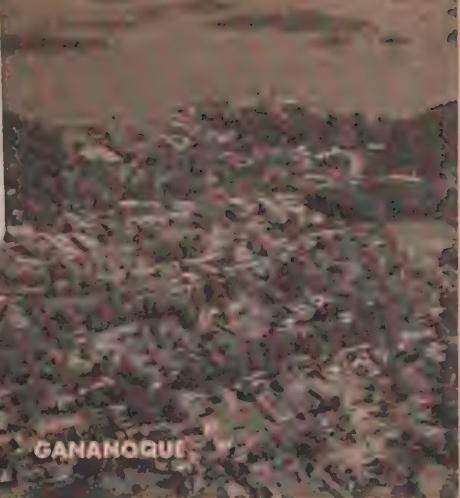

DATE	PLACE	EVENT
1	Mount Brydges	Agricultural Fall Fair
1	London	American Motors of Canada Sales Seminar—Carousel Motel
1	London	Dekalb Hybra Corn Limited Convention—Holiday Inn (King Street)
1	London	Department of Economics and Development—Holiday Inn
1	Windsor	Canadian Polish Congress Inc. presents Witold Malczynski, Pianist—Cleary Auditorium
1-2	Madoc	Agricultural Fall Fair
1-2	St. Mary's	Agricultural Fall Fair
1-2	Thedford	Agricultural Fall Fair
1-2	Tiverton	Agricultural Fall Fair
1-2	Toronto	Canadian Electronics Conference—Exhibition Park
1-2	Toronto	Ho-Re-Ca—Royal York
1-2	Toronto	Grocery Products Manufacturers of Canada—Park Plaza
1-3	Simcoe	R.C.M.P. Musical Ride at Norfolk County Fair
1-12	Toronto	15th annual season, Canadian Opera Company—O'Keefe Centre
1-19	Malton	Thoroughbred Racing Meets: Woodbine Track (Daily except Sundays)
1-Dec. 24	Windsor	Harness Racing (Standard Bred)—Windsor Raceway
2	London	Watkins Products of Montreal Sales Seminar—Carousel Motel
2	London	Poole Electronics Showing—Carousel Motel
2	Windsor	Women's Auxiliary of Hotel Dieu Hospital—60th Anniversary —Cleary Auditorium
2-4	Niagara Falls	Canadian Electrical Manufacturers Association, annual meeting—Sheraton-Brock Hotel
2-5	Owen Sound	Agricultural Fall Fair
2-5	Owen Sound	Harness Racing—Fall Fair Race Meet
3	Ottawa	Chemical Economics Division of the Chemical Institute of Canada. Subject: "Symbiosis by Government and Industry"
3-5	Markham	Agricultural Fall Fair
3-5	Metcalfe	Agricultural Fall Fair
3-5	Toronto	Canadian Council on Electrical Maintenance—Royal York
3-11	London	Six Ways with Figure Painting, Art Museum Japanese Wood-Block Prints, Art Museum Selections from the Permanent Collection, Art Museum
4	Dungannon	Agricultural Fall Fair
4	Toronto	Ontario Health Units Association—King Edward
4	Windsor	Industrial Accident Prevention Association, Essex-Kent Division, Safety Programme—Cleary Auditorium
4-5	Dorchester	Agricultural Fall Fair
4-5	Georgetown	Agricultural Fall Fair
4-5	Georgina	Agricultural Fall Fair
4-5	Owen Sound	R.C.M.P. Musical Ride, at Owen Sound Agricultural Society Fair
4-5	Tweed	Agricultural Fall Fair
4-5	Uxbridge	Agricultural Fall Fair

Psychiatric Institute

Tenders have been called for the new Toronto Psychiatric Institute to be built at College and Huron Streets, near the west campus of the University of Toronto, at an estimated cost of some \$6,000,000.

Public Works Minister Ray Connell, who made the announcement, said the project would consist of a 14-storey tower and connected three-storey research wing with accommodation for 204 beds. Structurally, the building will be entirely of reinforced concrete, with the exception of the roof over the large lecture room which will be spanned in steel.

Basic research will be carried out as part of the Institute's program on the first and second floors of the north wing, such as constitutional psychiatry, genetics and epidemiology, social and behavioural sciences, psychology and communications, neuroanatomy, neurophysiology, psychophysiology, psychopharmacology and biochemistry.

Mr. Connell said there will be four typical floors of 33 beds at seventh, ninth, tenth and eleventh floor levels. At the fifth floor level, there will be 21 beds in an emergency consulting service together with eight beds on the north side of the floor for a day care centre and night hostel.

The fourth floor will house clinics for the forensic out-patients service and a 22-bed in-patient service. The main entrance to the research wing from the university campus on the north will serve as the student entrance for lecture rooms located at ground floor level.

Giant Hydro Power Projects

Ontario Hydro forces are rolling back a new frontier of power in a desolate expanse of spruce and muskeg south of James Bay.

Little Long (see photograph, left) is the first of three plants to be built on a 15-mile stretch of the Mattagami. The project includes five miles of dams and dykes and the 21-mile Adam Creek diversion to channel flood waters past the Mattagami power sites. The station first produced power on October 2 and its full 121,600-kilowatt output will be reached by November 15.

While clean-up work continues at Little Long, construction forces are making rapid progress on the Harmon project (129,200 kilowatts), 13 miles downstream. Concrete has been poured for the centre section of the dam and rock excavation has begun for the headworks and powerhouse.

About three miles farther downstream preliminary investigation work is nearing completion at the Kipling site (132,000 kilowatts). Excavation for a river diversion channel and building of cofferdams are scheduled for November.

Power from the three Mattagami plants and the newly completed 174,800-kilowatt Otter Rapids G.S. on the Abitibi River, 27 miles east of Little Long will be transmitted 230 miles south to Sudbury over Canada's first 500,000 volt Extra High Voltage Line.

Department Of Agriculture Helping Farmers

Students discuss physiology of plant growth

Introducing Scientific Farming To Overcome Cost-Price Squeeze

MOST PEOPLE BELIEVE that to be a successful farmer it is only necessary to be willing and able to work hard and know how to do such simple tasks as feed chickens, milk cows and plough. But while it was possible for a farmer to make a living on this basis twenty years ago it is no longer so today. For to make a living from farming today a farmer has to be a scientific farmer, an astute businessman and a good machinist.

These are now necessities because it is almost impossible today for the old type farmer to make a living from the small family farm. The primary reason why this is so is that while the costs of goods and services purchased by farmers have been steadily increasing, the prices they have obtained for their products have remained generally about the same. As a result, a farmer's profit on each item or "unit" he produces—such as a dozen eggs or a bushel of apples—has been annually decreasing until now the profit margin is so small the only way he can make enough money to live by is by reducing his expenses and increasing his productivity. This can be done only by introducing scientific farming, adopting good business practices and utilizing more machinery, which is cheaper and more efficient and productive than hiring help.

This means that many of Ontario's farmers have to learn how to become better farmers and businessmen if they want to continue to make a living from farming. Consequently the Department of Agriculture has either instituted new services or expanded existing ones to help Ontario's farmers introduce more scientific and business-like methods of farming.

For example, the Department has expanded the soil testing facilities of its Ontario Agricultural College at Guelph. This has enabled more

farmers to send in soil samples taken from throughout their farms so soil specialists at OAC can analyze their chemical components and recommend a suitable programme to improve fertility.

In livestock raising the Department encourages farmers to improve the quality of their stock by the use of sires capable of transmitting their superior characteristics to their off-spring. In this regard the OAC has developed a process whereby the semen of selected bulls can be deep-frozen and stored so farmers can be supplied with the right type of any breed required for the best artificial insemination of their cows. The Department has also increased its emphasis to farmers that their livestock require a scientifically-balanced diet to obtain all the nutrients they need for healthy growth and the production of high-quality meats.

The Department has also increased its emphasis to farmers upon the necessity for preventive medicine. This has two purposes: to prevent the spread of infection; and to ensure the production of healthy stock.

Although preventive medicine is not new it has now become increasingly important since specialization in livestock often results in larger herds and flocks. For example, whereas a few years ago most farmers kept only a few hundred chickens for egg production today it is not unusual for farmers specializing in this type of farming to keep extremely large flocks. Consequently if one chicken develops a fatal poultry disease it can quickly infect many others before measures can be taken to prevent its spread. As a result, the farmer suffers financial loss.

To carry out a heightened programme of veterinary medicine the Department has recently completed a medico-surgical wing at the Ontario Veterinary College. This enables it to train more veterinarians. The facilities at OVC also enable neighbouring farmers to bring in their sick animals for diagnosis and treatment. In addition veterinarians throughout the Province can avail themselves of its diagnostic services. To facilitate speedy diagnostic service and treatment, the Department has established four Regional Veterinary Laboratories in the main agricultural centres of the Province.

COMING EVENTS

The Department of Travel and Publicity announces Coming Events in Ontario for the month of November as follows:

DATE	PLACE	EVENT	DATE	PLACE	EVENT
5	London	London Life Meeting—Hotel London	5-8	Toronto	Society of Industrial and Cost Accountants, Training Seminar—Guild Inn
1	London	Kilwinning Lodge—Holiday Inn	6	London	Kodak Company Display—Carousel Motel
1-2	Kitchener	Annual K-W Rotary Carnival—Kitchener Memorial Auditorium	6	Toronto	Toronto Anglers' and Hunters' Association—Eaton Auditorium
1-2	Toronto	Ontario Association of Agency Directors (Family Service and Welfare Agencies)—Guild Inn	6	Toronto	Gallery Talk: "A Contemporary American" Tour: Contemporary Canadian Art
1-4	Toronto	Salvation Army Toronto Congress—Massey Hall	6-8	Toronto	Special Lecture: Contemporary Painting by Gordon Smith, Director, Albright-Knox Art Gallery, Buffalo, New York—Art Gallery of Toronto
1-5	Hamilton	B'nai B'rith Conference—Sheraton-Connaught Hotel	6-8	Toronto	Central Ontario Women's Institutes—Royal York
1-16	London	Harness Racing—Western Fair Raceway	6-9	Toronto	Institute of Power Engineers, seminar and exhibit—Queen Elizabeth Building, Exhibition Park
1-28	London	Exhibit of Ceramics by Herb and Margaret Arris—Art Museum	6-16	London	Canadian Osteopathic Association—Westbury
1-28	London	Selections from the Permanent Collection—Art Museum	7	Toronto	"Kiss Me Kate"—London Little Theatre
2	Kingston	Intercollegiate Football—Western at Queen's	7-8	Niagara Falls	Women's Musical Group—Richard Goode, piano, 2 p.m. at Eaton Auditorium
2	London	American Federation of Grain Millers—Carousel Motel	7-9	Hamilton	Ontario Hatcheries Association—Sheraton-Brock
2-23	Toronto	Ontario Minor Hockey Association—King Edward	7-9	London	Ontario Council for Childhood Education, conference—Sheraton-Brock Hotel
2-28	London	Thoroughbred Racing—Greenwood Track	7-9	London	Ontario Association of Curriculum Development—Hotel London
2-30	London	Gallery Painting Groups—Fred Landon Library	7-9	London	London Bridge Tournament—Hotel London
3	Toronto	Japanese Children's Art—Richard Crouch Library	7-9	Toronto	Canadian Osteopathic Association (Auxiliary)—Westbury
		Ross Doddington, Bass-baritone—Free Sunday Concert Series	7-9	Toronto	Teachers' Wives' Association of Metropolitan Toronto. Dinner Dance at The Inn on the Park. Johnny Lindon and his Orchestra. Tickets may be obtained from Mrs. J. Fairfield 222-3123.
3	Windsor	Worldorama AKO Travelogue Series—Clearay Auditorium	8	Toronto	Clydesdale Horse Association of Canada—CNE Administrative Building
3-5	Toronto	Canadian Telephone Employees Association—King Edward Sheraton	8-9	London	Federation of Women Teachers' Association—Hotel London
3-5	Toronto	Boy Scouts of Canada, Training Seminar of Ontario Scout Executives—Guild Inn	8-9	London	Provincial Electronics Stereo Display—Carousel Motel
3-14	Toronto	United Co-operatives of Ontario, Sales Seminar—Guild Inn	8-9	London	O.I.C.E. Convention—Holiday Inn (King St.)
4	Kitchener	The Regimental Band and Massed Pipers of the Black Watch—Royal Highland Regiment with Highland Dancers—Kitchener Memorial Auditorium	8-10	London	Ontario Association of Artificial Breeders—Royal York
4-5	London	Women's Institute Convention—Holiday Inn (King St.)	8-10	Toronto	1963 Lake Erie International Vacationland Association
4-5	Toronto	Central Canada Broadcasters Association conference—Royal York	8-13	Kitchener	Canadian Education Week, Planning Committee—Guild Inn
4-26	London	Contemporary Polish Prints—Art Museum	8-28	London	Twin City Operatic Society Annual Broadway Music Festival—K-W Memorial Gardens
5	Toronto	Audubon Films—Eaton Auditorium	9	London	5th Biennial—Art Museum
5-7	Niagara Falls	Ontario Federation of Labour—Sheraton-Brock	9	London	Intercollegiate Football—McGill at Western
5-7	Toronto	Canadian National Packaging Exposition	9	Toronto	Latvian National Federation—Eaton Auditorium
			10	Aberfoyle	Intercollegiate Football—Queen's at Toronto
			10	Toronto	Aberfoyle Mill Flea Market, monthly antique show and sale—Hwy. 6 about 2 miles north of Hwy. 401
					Jeanette Zarou, soprano—Free Sunday Concert Series—Art Gallery of Toronto

To Meet Challenges Of Present-Day Farming

Neutron moisture meter establishes moisture characteristics of soil

*—Photos by Dept. Public Relations, Ontario Agricultural College
Typical Ontario tobacco farm*

The Department has also increased its services to growers in the identification and control of injurious insects and diseases. This is necessary if quality is to be maintained in the production of fruit. The dissemination of spraying information is an important part of the Department's programme.

Another important way in which the Department is helping farmers to solve problems in introducing scientific farming is in its research programme. Basically there are two different types of research being carried on by the Department.

The first is a continuing programme to improve farming methods by such means as: experimental work to determine the most productive varieties of hybrid corn, white beans, etc.; tests on various crops of different types of fertilizers, insecticides, fungicides and weed killers; and specific projects directed at eliminating or controlling special animal diseases as brucellosis and mastitis in cattle, rhinitis in swine and diseases of horses and poultry.

The second are projects to keep the Department abreast of the new needs of the farming industry. Some of these are to help solve problems connected with the application of scientific farming, particularly those dealing with the proper utilization of farm machinery to save the farmer both time and labour. In this regard the Department has undertaken research projects to determine the best ways of automatically feeding livestock, removing manure, conveying eggs and transporting milk. As a result it is now possible for a livestock farmer to handle many more animals than formerly.

Indicative of the importance with which the Department views its future agricultural research programme, is the fact that it has recently been co-ordinated under a director. His function is not only to co-ordinate the Department's entire research programme so its facilities will be utilized to the best advantage, but also to keep all farmers and industry informed of their findings.

The formal education of young people is also an important way in which the Department is helping to introduce scientific farming. To accomplish this the Department maintains various colleges and schools throughout the Province.

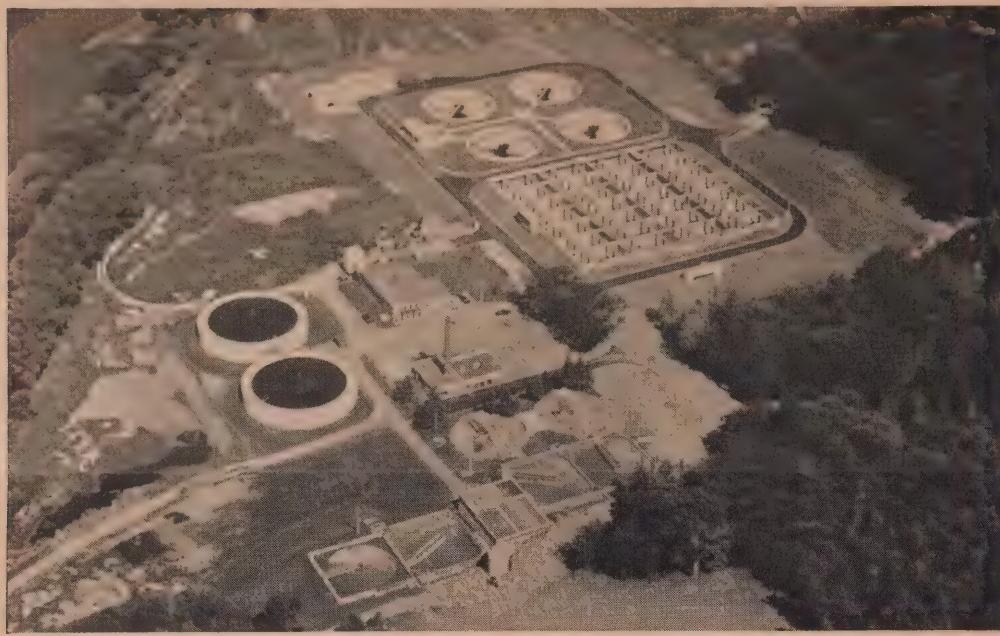

At Guelph is the Ontario Agricultural College and the Ontario Veterinary College, both of which offer university degree courses to those young men who wish to specialize in the various aspects of agricultural science, such as animal husbandry, bacteriology, entomology and zoology, horticulture, agricultural economics and veterinary medicine. These colleges also offer post-graduate courses up to a Master's degree. It is hoped that soon they will be able to offer courses up to a Ph.D.

Schools at Guelph, Ridgetown and Kemptville also offer two-year diploma courses on scientific farming to those young men who either intend to return to farming or to take it up as a vocation.

To educate young men and boys in the disciplines of scientific farming the Department plays the major role in the encouragement and maintenance of 4-H Agricultural Clubs in the Province. These indoctrinate their members in the necessity and principles of scientific farming by means of individual projects of an agricultural nature. These projects are under the guidance of the Department's agricultural representatives, who are stationed in every county and district of Ontario. These agricultural representatives also work closely with the Junior Farmers. As an indication of the importance of these two organizations, there are 18,000 4-H Club members in Ontario and almost 7,000 Junior Farmers.

Insofar as older farmers are concerned the Department has several ways of assisting them in adopting the principles of scientific farming. These include: scientific farm demonstrations at the Department's colleges and schools; the work of the members of the Department's Extension Branch who visit farmers on their farms and speak at farmers' meetings; and the Department's Information Branch which sends out large numbers of press releases and articles to newspapers, magazines, and radio and TV stations.

WATER POLLUTION CONTROL PLANT KITCHENER

Mayor Kieth Hymmen of Kitchener, assisted by Charles S. MacNaughton, Minister of Highways, and A. M. Snider, Chairman of the Ontario Water Resources Commission, officiated at the recent official opening of Kitchener's expanded water pollution control plant.

This project, which was a combined effort of the municipality and the Ontario Water Resources Commission, has increased existing facilities to include secondary treatment of Kitchener's waste water.

The plant is designed to serve a population of 86,500 persons and the secondary facilities are capable of handling some 13.5 million gallons a day.

5 UNIVERSITIES IN LIBRARIES PROJECT

Education Minister William Davis has announced the establishment of the "Ontario New Universities Library Project". This will be a co-operative undertaking which involves the University of Toronto, Scarborough College, Erindale College, Trent University, Brock University, and the new University at Guelph. It will lead to the development of basic libraries of 35,000 volumes for each of the five new universities and colleges. The project, which has already been launched, will continue until June 30, 1967.

Under the plan the University of Toronto will expand its staff and facilities to provide the machinery to select, purchase, index, catalogue and deliver books to the five new participating institutions. This procedure will avoid the costly duplication which would have occurred if each university had set up a similar organization to serve its own institution only. In addition, it will be possible to process books much more rapidly than would otherwise have been possible.

It is estimated on the basis of detailed studies made by Mr. R. Blackburn, Chief Librarian, University of Toronto, and his Staff that during the balance of the current fiscal year savings in administrative costs of \$300,000 can be made and that over the life of the Project these savings will amount to \$1,400,000. These figures are based on the accepted standard that it costs approximately as much to process a book until it arrives on the library shelf as it does to purchase the book. Under the procedure to be used in the Project this per unit cost will be substantially reduced.

The Ontario New Universities Library Project is the result of detailed and thorough studies conducted over the last year and a half. Initially, the Advisory Committee on University Affairs asked the Committee of Presidents of Provincially Assisted Universities to explore the possibility of some co-operative effort to provide basic libraries for new institutions. The Committee in its Report, POST-SECONDARY EDUCATION IN ONTARIO 1962-70, recommended that consideration be given to such a possibility. The Department of Education then convened meetings to which were invited representatives of the new institutions to discuss proposals prepared by Mr. Blackburn. After thorough discussion, incorporation of additional suggestions, and agreement, it was decided to proceed with the Project. In addition to the five institutions already committed, there is a possibility that York University will come into the plan for its new campus at Jane and Steeles Avenues although its position is somewhat different from the other institutions in that it already has a substantial library on the Glendon Hall campus.

While the Project will provide a basic library, it will still be necessary for each institution to purchase books for courses which it is offering but which may not be given by other participating universities. It will also be necessary for each college to purchase its own periodicals, serial publications, out-of-print materials, and additional books which relate to the unique characteristics of the institution. This development will permit each library to build its own staff at a slower and more desirable rate to the point where it can take over full responsibility for its activities at the termination of the Project in June, 1967. It is felt that by the latter date when the basic library of 35,000 volumes is complete, each institution will wish to develop special areas and that the advantages of co-operative purchase will have been accomplished.

"During the studies and deliberations on this subject the universities, their officials, and indirectly the boards of governors have shown a high degree of co-operation, flexibility and desire to work together. The University of Toronto in particular is to be commended for its willingness to assist the newer institutions by volunteering to undertake the administration of the Project under Mr. Blackburn's direction," Mr. Davis said.

"It may well be that this pattern can be applied to other areas with resulting substantial savings to the institutions and the taxpayers," continued Mr. Davis.

FARM MACHINERY BOARD WILL BE ESTABLISHED

Recommendation of the Ontario Farm Machinery Investigation Committee that a Farm Machinery Board be established to act in an advisory capacity in regard to all aspects of farm machinery, will be implemented by the Ontario Government.

Appointment of the Investigation Committee followed the decision of the Agriculture Committee of the Legislature that a survey of the farm machinery industry would be in the best interests of the machinery companies and the farmers of the Province.

In an exhaustive report submitted to the Minister of Agriculture, the Investigating Committee suggests that the establishment of a Farm Machinery Board would provide a means of liaison between manufacturers, distributors, and purchasers. It recommends that a Board of a minimum of seven members be appointed which would represent the manufacturers, distributors, dealers of farm machinery, farm organizations and individual farmers.

One function of the Board would be to evaluate, review and report on the developments in testing, quality control of machinery as well as the distribution and availability of spare parts. The committee further recommends that one function of the Board would be to review and report on the effectiveness of any developments in the industry before any legislation be considered that would direct or control the manufacture, testing, distribution or sale of farm machinery in the Province. It is also recommended that the Board be advised of new machines being offered for sale and that it should be advised of tests of the machines' capabilities.

Expansion of facilities of the Agricultural Research Institute to provide for research into and development of new methods and types of equipment is proposed as well as the development of facilities for the field testing of machines.

"There is need for an engineering and economic analysis of the size, type and number of tractors and implements for the various sizes and types of farming operations in Ontario" states the report. "The study should include the amount of time spent on different operations. This would assist in a better basis for the selection of tractors and machinery and the mating of machines to give more efficient operation."

The Committee also recommends that the Ontario Highway Traffic Act be amended to enforce clear identification of slow-moving farm equipment for both day and night travel on the highways; that safety programmes be promoted for all age levels of the farm population.

The development of extension publications for the various types of farm machinery and the establishment of diploma or technical courses for the training of mechanics and servicemen is also advocated.

Recommendations, directed primarily to the manufacturing industry, suggest that laboratory and field testing of all tractors at pre-production and first production levels be continued and that quality control standards be improved. It was felt that this would reduce the need for frequent model changes which should only be made when design improvements result in more efficient performance. It was also suggested that engineering tests and assessments used for advertising purposes be quantitative in value and related to conditions prevailing in Ontario.

The Committee also recommended that the warranty period for all machinery be for a minimum of one year and that increasing emphasis be placed on the standardization of parts for different machines.

The purpose of this publication is to advise the people of Ontario of the services which their Government renders. Such services are effective in the degree to which they are known and used. The contents are for immediate republication. When change of address is requested, the address as printed on a copy of the publication should be enclosed. Communications with regard to the publication should be addressed to The Director, Advertising Branch, Issued by the Advertising Branch, Dept. of Travel and Publicity, Parliament Buildings, Toronto.

No. 9

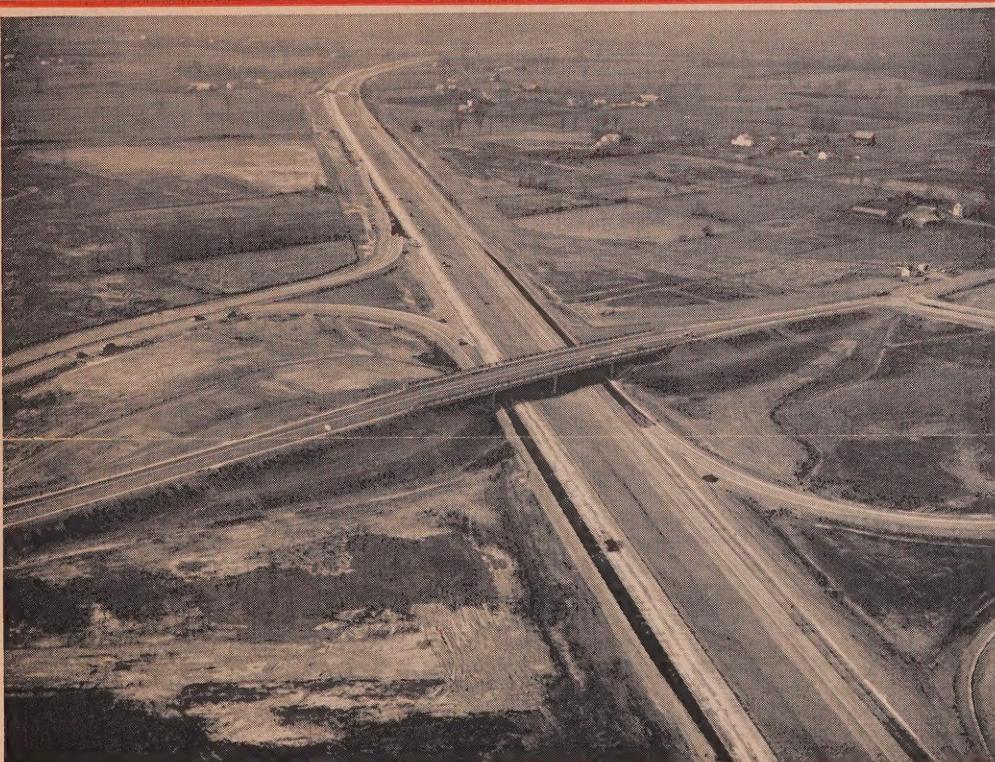

LEGISLATURE OPENING

Officials participating in the opening of the special session of Ontario's 27th Legislature are shown in the photograph (left). They are: Lieutenant-Governor Earl Rowe (centre); Commander Peter Wilch, aide-de-camp to the Lieutenant-Governor; Prime Minister John Robarts (extreme right) and Roderick Lewis, Clerk of the Legislature (to the left of the Prime Minister).

The Legislature ended its two-day session on October 30th after giving unanimous approval to a bill enabling the Province's municipalities to take advantage of the Federal Government's Municipal Development and Loan Fund. Under the Federal formula, Ontario has been allocated \$136,769,000.

The Provincial bill gives Ontario powers to disburse funds once the Municipal Affairs Department and the Ontario Municipal Board are satisfied that the Municipality's application conforms to Federal specifications, and that the municipality has the financial means to repay the money.

The House selected a new Speaker, Donald H. Morrow (PC, Ottawa West). Mr. Morrow, a school teacher, has been a member of the Legislature since 1948. He has submitted his resignation as Chairman of the Ontario-St. Lawrence Development Commission.

HIGHWAY No. 401 NEAR COMPLETION

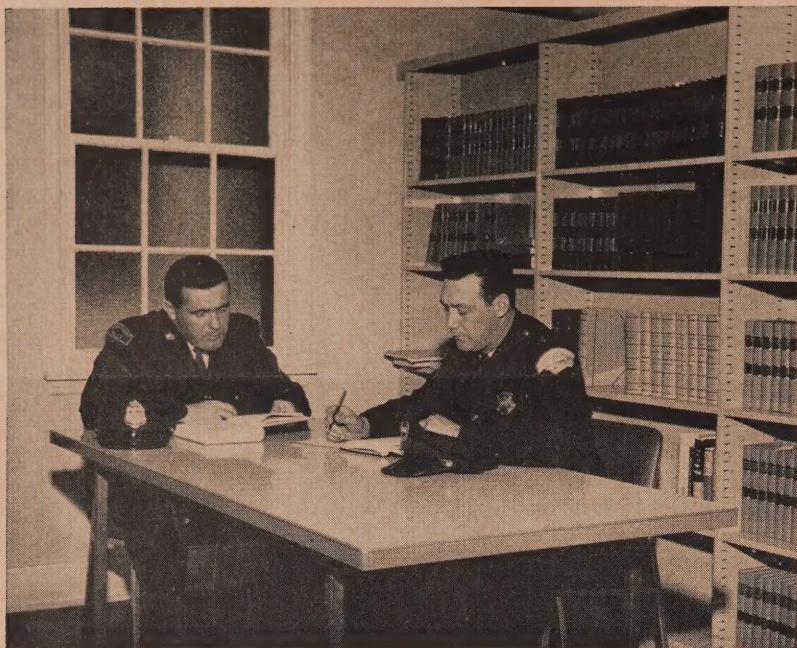

An 18-mile, four-lane section of Highway 401 from Cornwall westerly to the Aultsville Sideroad, west of Ingleside, was opened recently. At its eastern end in Cornwall the new four-lane highway joins a 13-mile section of Highway 401 stretching easterly to Lancaster, opened in September of last year. At Lancaster there is a convenient transfer to either Highway 2 or Highway 34. The view, taken facing west (photo left), shows part of the Brookdale Avenue interchange, within the limits of the City of Cornwall, with the new four-lane concrete highway stretching off to the horizon.

Highways Minister Charles S. MacNaughton has announced the opening of the 8.5-mile section of Highway 401 north of Marysville and Napanee, at the western and eastern ends, respectively. Following rapidly on the opening of the section from Cornwall to Aultsville Sideroad and the recent opening of sections in Western Ontario between London and Tilbury, this newest stretch of Highway 401 now permits a through 500-mile drive on that freeway from Windsor to the village of Lancaster, east of Cornwall.

The sections of Highway 401 opened to date in 1963, including the Marysville-Napanee link, total 97 miles. This now puts into service all of Highway 401 with the exception of a 9-mile section at the Quebec end.

Season's Greetings — Best Wishes For 1964

BASIC TRAINING FOR POLICEMEN GIVEN

Cadets studying in Police College library

Instructors at Police College in front of Administration Building

Courses Of Instruction Include Evidence, Fraud, Court Work, Robbery And Traffic

In January of this year the Ontario government established a police college at Aylmer, near London.

The college is unique on this continent. It is the only police college run by a provincial or state government in America, which provides training for all police officers within that state or province.

The college was started to provide recruit and advanced training for the thousands of policemen in the province. Until it was founded the opportunities for this training were limited.

Some of the largest centres in the province—Toronto, Ottawa, Hamilton, London, Windsor—had permanent or semi-permanent courses for beginners, and other smaller cities had occasional courses.

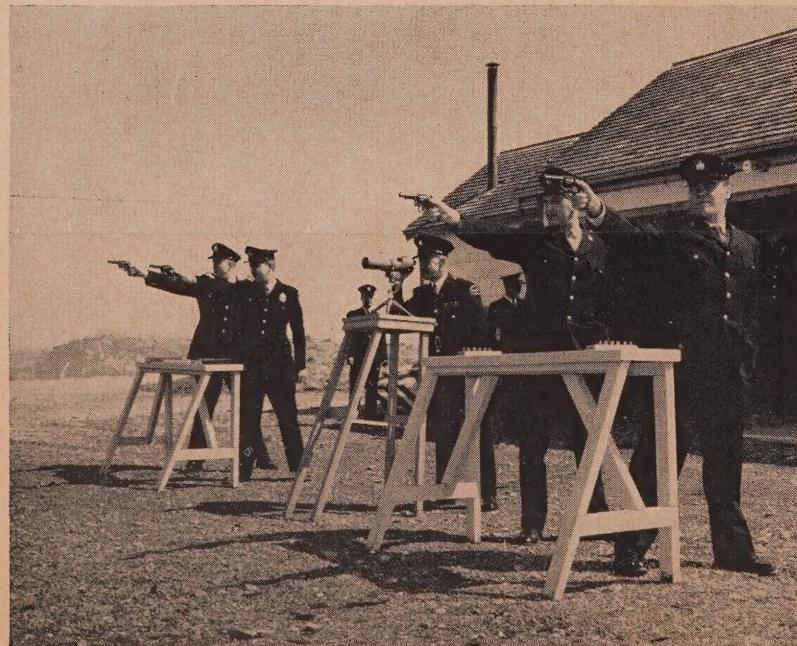

But a great many policemen were getting no formal training at all. They normally were given some basic instruction by the local chief or a senior officer. They then picked up the remainder of their training by going out on the beat with experienced constables.

Opportunities for advanced training were even more limited. Ontario police officers requiring specialist training—detective work, traffic, finger-printing, etc.—usually had to rely on training provided by the Royal Canadian Mounted Police, or training facilities in the United States.

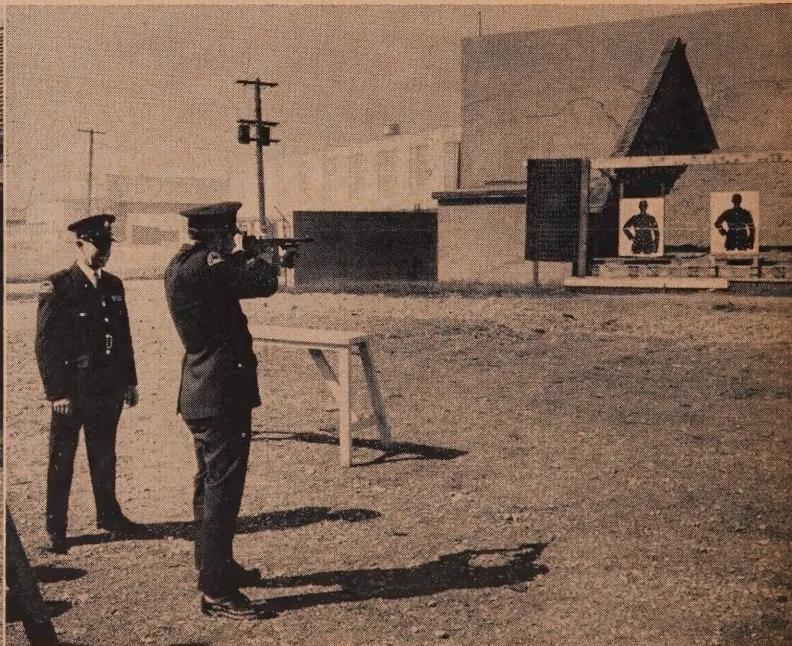

With the need very apparent the government decided to establish a police college in Ontario. An abandoned air force base at Aylmer, an ideal site with good barrack accommodation, class-room space, parade ground and gymnasium, was purchased.

Under the direction of the Attorney-General, and the Ontario Police Commissions, courses were set up and a staff of senior police officials and specialists in police work was recruited.

The first classes of 64 recruits started in January on a 12-week course. Since then the college has been continuously busy training recruits, with usually 4-6 classes of 32 men going through at one time. Also there have been seminars for police chiefs, and a start on specialized courses for experienced policemen. These have included a two-week course for sergeants and inspectors, and a five-

Director of Aylmer Police College, Mr. J. L. Mennill

week course for detectives. In the case of these specialist courses special instructors were brought in to supplement the regular staff.

This staff is headed by Mr. J. L. Mennill, who is the director of the college. Mr. Mennill, who was a flight-lieutenant in the RCAF during the war, was the director of the Ontario Forest Ranger School at Dorset for a number of years.

The assistant director is A. E. Knight, formerly chief of the London, Ont. force. There are ten instructors, experienced men from the RCMP, OPP and municipal police forces.

To date the major work of the college has centred on recruit training. The men in these classes have mostly been in their early twenties. They have come from all across the province, including a substantial number from the OPP (which has had its own training college for some years).

At the college they study in an atmosphere somewhat like that of a military school. They live in barracks which are divided into comfortable but plain cubicles, with two men to a room. During their class-work day (from 8:30 in the morning until 5 in the afternoon, Monday to Friday), they must be in uniform. Once a day there is a full inspection with the students marching to the parade ground in platoon formation. Every school day there are eight 45-minute classes.

In the recruit course these include English, Public Speaking and Report Writing, Law (Canada Statutes, Ontario Statutes and the Criminal Code), Cur-

rent Affairs, First Aid, Public Relations, Police Methods, Physical Training and Small Arms, Statistics and History and Examinations.

The courses are intensive. Police methods, for instance, cover instruction on how to handle break and enter and other criminal cases, court procedure, communications, presentation of evidence, frauds, how to determine intoxication, motor vehicles offences, patrol responsibility, robbery, traffic control, and other miscellaneous matters.

The major part of the time is spent in class-room work. But there are also periods in the gymnasium (where instruction is given in police-holds, among other things) and on the revolver range. There are also on the base comfortable lounges and outdoor and indoor facilities for recreation.

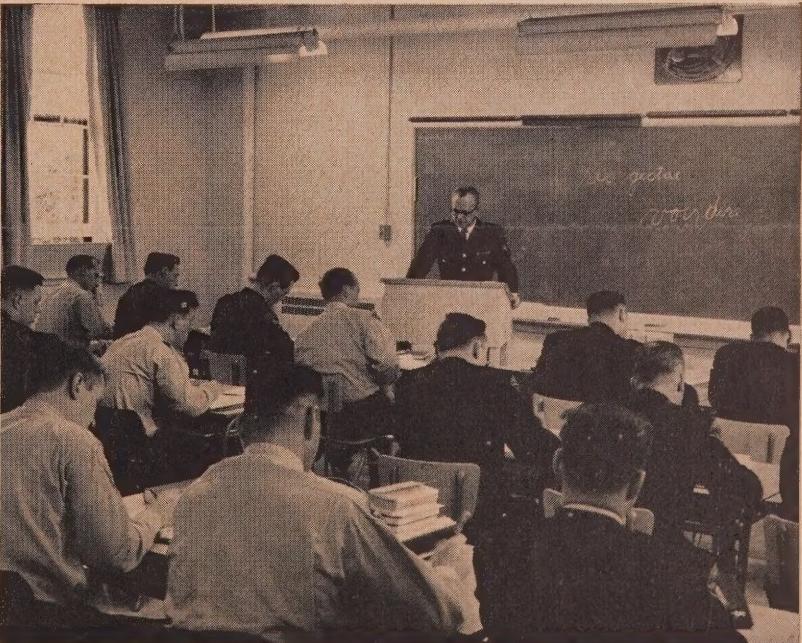

The province pays almost the entire cost of the courses, including transportation. The only charge to municipalities is a \$10 registration fee.

It is planned that the college will have a steady growth in the future. Major emphasis will still have to be maintained on basic training—which includes the training of many men throughout the province who have been police officers for some time but do not have formal training. The next step is an expansion of refresher courses for experienced policemen. Then will come full development of advanced courses in modern methods for senior officers and specialists.

The final aim, of course, is to have in Ontario a police establishment with a training second to none.

Classroom instruction on criminal code

COMING EVENTS

The Department of Travel and Publicity announces Coming Events in Ontario for the months of December and January as follows:

DECEMBER			DATE	PLACE	EVENT
1	Windsor	AKO Worldorama "British Isles"—3 p.m. —Cleary Auditorium	26-31	Collingwood	S.O.S.Z. Junior Training Ski Camps—Alpine
1-7	Toronto	Safe Driving Week	26-31	Midland	S.O.S.Z. Junior Training Ski Camps—Nordic
2	Toronto	Outdoor Adventure Series presents: "Making Sea Movies" —Eaton Auditorium, 8.15 p.m.	26-31	Midland	Ontario Ski Jumping School
2-6	London	Bell Telephone Display—Hotel London	27-28	Toronto	Lambton Masters' Invitation Curling Bonspiel
2-6	Metro Toronto	Thornhill Invitation Curling Bonspiel	27-30	Toronto	Ontario Secondary School Teachers' Federation —Royal York
2-21	London	Society of Canadian Painters-Etchers and Engravers —Art Museum	27-30	Toronto	Provincial Youth Conference on the Alcohol Problem —Central Y.M.C.A.
2-31	London	Master Canadian Painters and Sculptors—Art Museum	27-31	Ottawa	"Ali Baba and the Forty Thieves"—Roy Hayden-Hinsley
2-Jan. 11	London	Selection from the Permanent Collection—Art Museum	31-Feb. 8	Toronto	Rainbow Ridge Ski Club—First annual invitational slalom race—Manufacturers' Life
3	Toronto	Audubon Wildlife "Our Changing Heritage" —Eaton Auditorium	1	Toronto	Canadian National Boat Show—Automotive Building, Exhibition Park
3, 4, 11, 12	Toronto	Preliminary hearing on briefs concerning Medical Services Insurance—Council Chamber, City Hall	1-4	Toronto	JANUARY
4	Toronto	Film: Cubism, Käthe Kollwitz; Gallery Talk: A Contemporary of Picasso; Tour: Recent British Painting; Staff Lecture: Picasso—Since "Guernica", by Jean S. Baggs, Curator—Art Gallery of Toronto	4-11	Bracebridge	New Year's Day
4	Toronto	Ontario Retail Feed Dealers' Association—King Edward	6	Ottawa	Tournament of Champions: 8-rink round robin series (curling)—rinks from Edmonton, Regina, Detroit, Charlottetown, Hanover, Unionville and Toronto, sponsored by Toronto Kiwanis and Curl Master Brooms—Maple Leaf Gardens
4-5	Hamilton	Ontario Vegetable Growers' Marketing Board Convention —Sheraton Connaught	7, 8, 14, 15, 21, 22, 28, 29	Toronto	Outdoor Adventure Series presents "Kayak to Cairn No. 6" Eaton Auditorium, 8.15 p.m.
4-6	London	Metropolitan Life Meeting—Hotel London	9-10	Toronto	Rainbow Ridge Ski Club—Canadian Ski Instructors' Alliance Professional Ski Instructors' School
4-6	Toronto	Canadian Institute of Chartered Accountants—Accounting and Auditing Research Committee—Guild Inn	9-11	London	The Hungarian Quartet—Pro Musica Concert
5	London	Sun Life Meeting—Holiday Inn (King St.)	9-11	Sault Ste. Marie	Preliminary Public Hearing on Medical Services Insurance—Galbraith Bldg., University of Toronto
5	Toronto	Women's Musical Club—John Boyden, baritone —Eaton Auditorium—2 p.m.	10-11	Burlington	Mixed Invitation (Curling) Toronto C.S.&C.
5-6	Toronto	Laboratory Section—Canadian Public Health Association—King Edward	10-11	Cobden	Figure Skating Carnival and Western Ontario Figure Skating Championships—Fort Erie Memorial Arena
5-6	Toronto	Ontario Creameries Association—Royal York	11	Collingwood	City of London Curling Bonspiel at London C.C.
6	Hamilton	"Our Changing Heritage", presented by Emerson Scott, an Audubon Wildlife Series—Royal Botanical Gardens	11-18	Ottawa	Regional Road Safety Workshops, Ontario Department of Transport
6	London	Society of Industrial and Cost Accountants of London—Carousel Motel	11-Feb. 16	Toronto	Skyway Curling Bonspiel—Burlington C.C.
6	London	Builders Exchange Annual Dinner—Hotel London	12	Aberfoyle	Cobden Mixed Curling—Cobden C.C.
6	Ottawa	Montreal Bach Choir-Pro Musica Concert	14-26	Toronto	S.O.S.Z. Team Giant Slalom (Skiing)—Craigleath S.C.
6-7	Cobden	Curling Bonspiel	16	Ottawa	Peterborough Curling Bonspiel—Peterborough C.C.
6-7	Toronto	Institute of Chartered Accountants for Ontario—conference—Guild Inn	16-18	Tillsonburg	"Bousille and the Just"—Little Theatre
6-8	Hamilton	Ontario Medical Association Bonspiel (accommodation) —Sheraton-Connaught	17-18	Niagara Falls	Canada Life Curling Trophy (Metro Toronto only)
6-14	London	"Gideon"—London Little Theatre	17-19 (T)	Guelph	"Picasso and Man". Approximately 250 paintings, sculpture, drawings and prints by Pablo Picasso will be on display. Included in the selection are paintings lent by the U.S.S.R. which have never before been seen in North America—Art Gallery of Toronto
6, 8, 13, 14	Windsor	Windsor Light Opera Association presents: "Oklahoma". Dr. John H. L. Watson, Producer-Director —Cleary Auditorium	17-19	Niagara Falls	Flea Market—Sale of antiques and art work from all across Ontario and Quebec
7	Carleton Place	Santa Claus Parade	18	Toronto	Shakespeare, "Hamlet"—Crest Theatre
7	Forst Frances	Santa Claus Parade, sponsored by Rotary Club	18	Collingwood	Royal Shakespeare Company—"The Hollow Crown"
7	London	Purchasing Agents Meeting—Hotel London	18	Sarnia	Tobacco Belt Curling Bonspiel
7	Owen Sound	Invitation Ski Jumping—"Early Birds"—all classes—Georgas Bay Ski Club	19	Flesherton-Markham	Alumni Association, School of Horticulture holds its annual Educational Convention—Park Hotel, Clifton Road
7	Windsor	Windsor Symphony Society Children's Concert. Guest Artist: Michele Teno, soprano—Conductor: Matti Holli—Cleary Auditorium, 11 a.m.	19	Windsor	Winter Carnival
7-14	Ottawa	"Write Me A Murder"—Little Theatre	20	Ottawa	Niagara's Winter Carnival begins
7-14	Toronto	Toronto O'Keefe Mixed Curling Bonspiel	21	Ottawa	Speed-Sports '64
8	Aberfoyle	Flea Market—sale of antiques and art work from all across Ontario and Quebec	23-25	Kenora	S.O.S.Z. "C" Class Ski Championships and Qualifying—Collingwood S.C., Blue Mtn. Winter Park
8	Brantford	Special Christmas concert, presented by Brantford Symphony Orchestra—Capitol Theatre	23-25	Kingston	O.C.A. Schoolboy Curling Finals
9	London	Electric League of London—Carousel Motel	24	Ottawa	Invitation Skiing-open, Beaver Valley Giant Slalom, Austrian S.C. at Beaver Valley Resort
9	London	London Bridge Tournament—Carousel Motel	24-25	Renfrew	Windsor Symphony Orchestra
9	Ottawa	Handel's "Messiah"—Choral Society	24-25	St. Thomas	Montreal Symphony Orchestra with John Ogdon
9-11	Toronto	Ontario Food Processors Association—Royal York	24-26	Niagara Falls	Grace Bumbry, Mezzo-soprano
9-12	Simcoe	Simcoe Little Theatre presents—"Picnic"	24-Feb. 9	Toronto	Kenora Men's Curling Bonspiel
11	Toronto	Film: "Stained Glass at Fairford"; Gallery Talk: "An Old Master"; Christmas Concert: The Vocal and Instrumental Ensemble of General Brock Public School, Scarborough. Recent British Painting—Art Gallery of Toronto	25	Kingston	Kingston C.C. 88th Annual Curling Bonspiel
11-13	Toronto	Toronto C.S.&C. Chisholm Curling Invitation	25-26	Ottawa	Canadian Players, "Henry IV, Part 1"
13	Ottawa	Canadian Players—"Private Lives"	26	Owen Sound	Renfrew Mixed Curling Bonspiel
13	Toronto	St. Simon's Concert—Eaton Auditorium	26-29	Windsor	St. Thomas Married Couples' Curling Bonspiel
13-15	Thornbury	S.O.S.Z. Amateur Ski Instructors' School—Georgian Peaks' Resorts	27-28	Cornwall	Second weekend of Niagara's Winter Festival
14	Collingwood	Invitation "9 and Under" Ski Team Race—5 members (open)—Toronto Ski Club at Blue Mountain	27-29	Kenora	St. George's Americanadian Curling Invitation
14	London	I.O.D.E. Meeting—Hotel London	27-30	Hamilton	Kingston Winter Carnival
14	Ottawa	Canadian Players—"Masterpieces of Comedy"	28	Ottawa	Canadian Players: "An Enemy of the People"
14	Toronto	Denise Tunney, pianist—Eaton Auditorium	28-Feb. 1	Toronto	S.O.S.Z. Senior Ski Championships—Cross Country—Georgas Bay S.C.
14-15	Thornbury	S.O.S.Z. Alpine Coaches' School—Georgian Peaks Resorts	28-Feb. 19	Toronto	S.O.S.Z. Junior Championships—Alpine—Georgian Peaks Resort
15-17	Toronto	United Co-operatives of Ontario—Royal York	29	Simcoe	Invitation Skiing (closed)—"12 and under"—Alpine (by invitation)—London Ski Club
16	Toronto	St. Michael's Choir Concert—Eaton Auditorium	29-Feb. 1	Toronto	S.O.S.Z. Senior Ski Championships—Jumping—Georgas Bay S.C.
16-17	London	Ford Tractor Division—Carousel Motel	30	Toronto	S.O.S.Z. Junior Ski Championships—Nordic—Georgas Bay S.C.
17-18	Toronto	Ontario Beekeepers' Association—Royal York	30-Feb. 1	Metro Toronto	National House Builders' Association—Cleary Auditorium and Memorial Convention Hall
18	London	Department of Chemistry, University of Western Ontario—Holiday Inn (King St.)	30-Feb. 2	Trenton	International Bantam Hockey Tournament
20-23	Toronto	Parkway Schoolboy Open (Curling)	31	Toronto	Kenora Ladies' Curling Bonspiel
21-28	Toronto	Parkway Open (Curling)	31	Metro Toronto	Ontario Turkey Association Conference—Sheraton Connaught Hotel
21-Jan. 4	Toronto	A new adaptation of "Sleeping Beauty"—Musuem Children's Theatre, Royal Ontario Museum	31	Toronto	Montreal Symphony Orchestra with David Oistrakh
22	Windsor	Christian Culture Series presents: Detroit Symphony Orchestra, Ursuline Chorale—Cleary Auditorium	31-Feb. 2	Deep River	High Park Mixed Curling Invitation
23	London	The British Satirists: Hogarth and Rowlandson—circulated by National Gallery of Canada—Art Museum	31-Feb. 2	Minden	Shaw's "Caesar and Cleopatra"—Crest Theatre
25	Toronto	Christmas Day	31-Feb. 2	Niagara Falls	Annual Meeting Norfolk Association for Retarded Children
25-27	Toronto	Ontario Public School Men Teachers' Federation King Edward	31-Feb. 8	Toronto	Canada Farm and Industrial Equipment Trade Show
26	Camp Borden	Boxing Day	31	Toronto	Academy of Dentistry Meeting at the Faculty of Dentistry—University of Toronto
26-28	Toronto	Camp Borden Army Yuletide Curling Bonspiel	31	Toronto	Lambton Men's Invitation Curling Bonspiel
26-28	Toronto	Mississauga Mixed Invitation Curling Bonspiel	31	Toronto	Bay of Quinte Men's Curling Bonspiel
26-28	Toronto	Royal Canadian Pigott Mixed Curling Bonspiel	31	Toronto	O.C.A. Tankard Curling final at St. George's
26-28	Toronto	Terrace Mixed Curling Bonspiel	31	Toronto	O.C.A. Burden Trophy final at Mississauga
